

Added variable plot  
Poisson regression  
Linear effect, slope=1  
Unweighted  
Using 'resid\_deviance' residuals

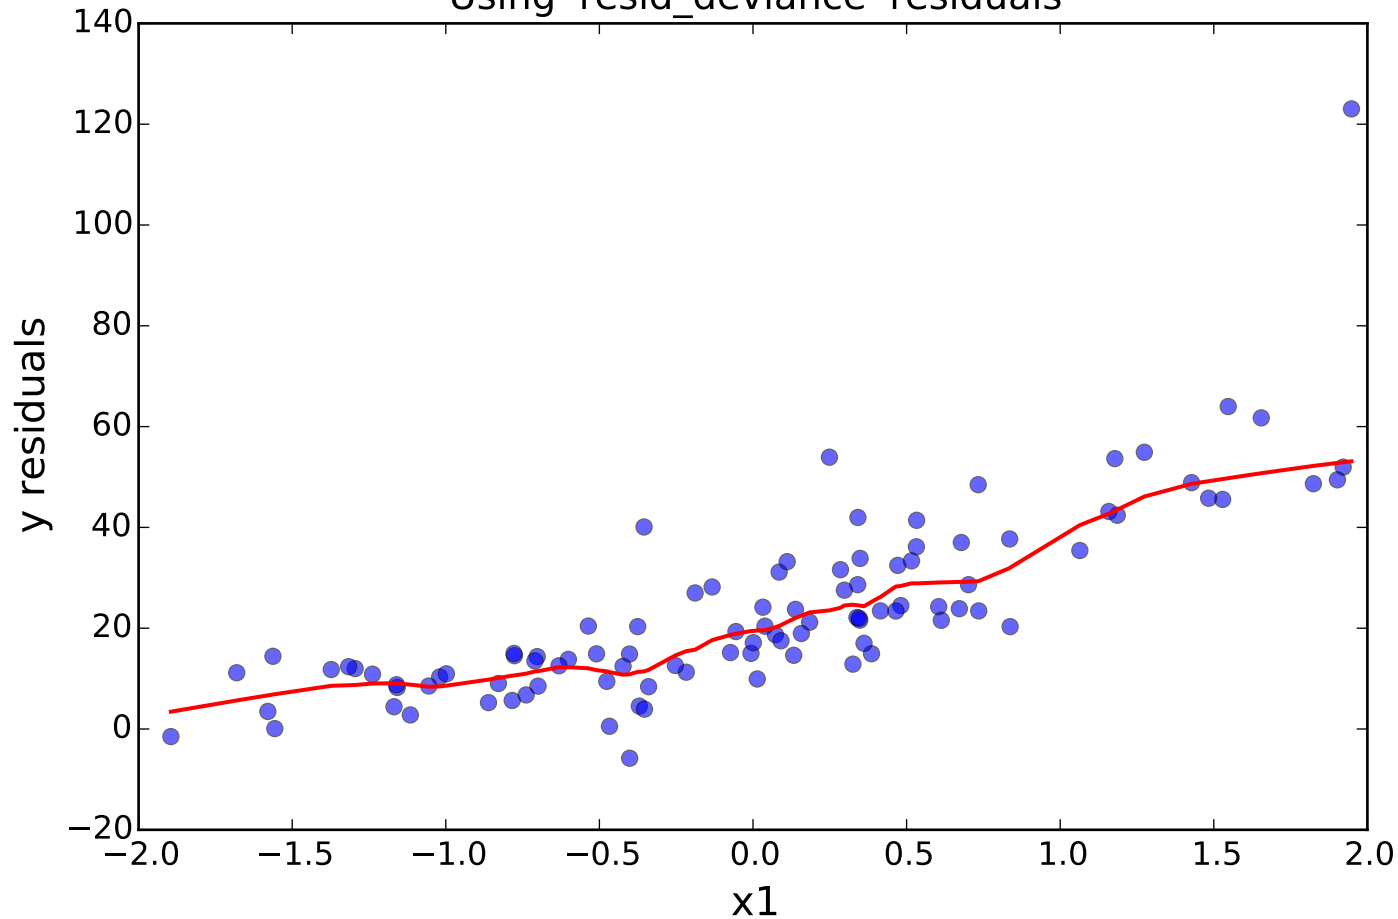

Added variable plot (called as method)

Poisson regression

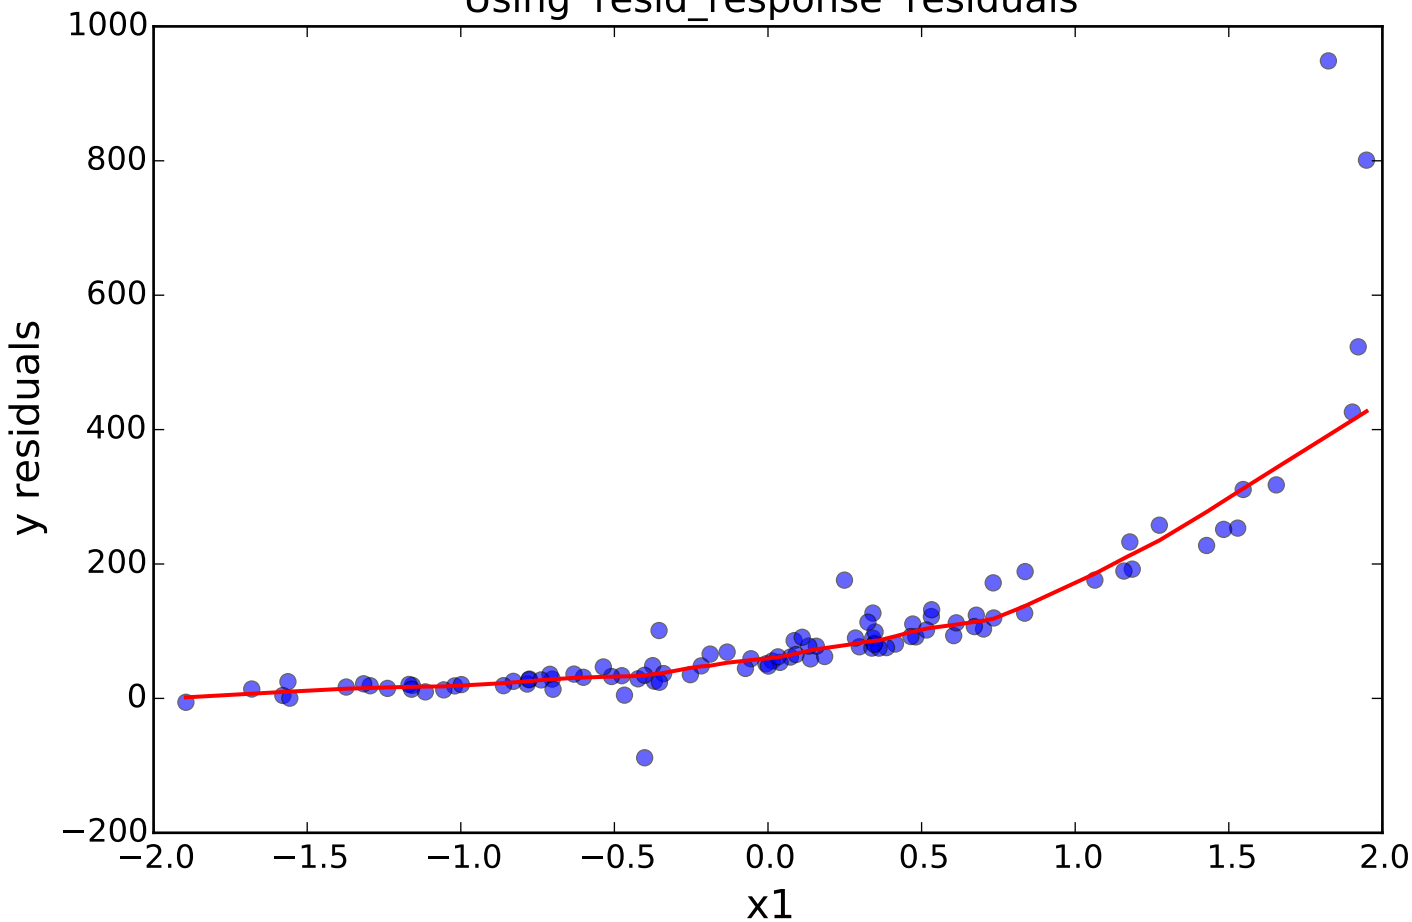

Linear effect, slope=1

Unweighted

Using 'resid\_deviance' residuals

Added variable plot  
Poisson regression  
Linear effect, slope=1  
Unweighted  
Using 'resid\_response' residuals

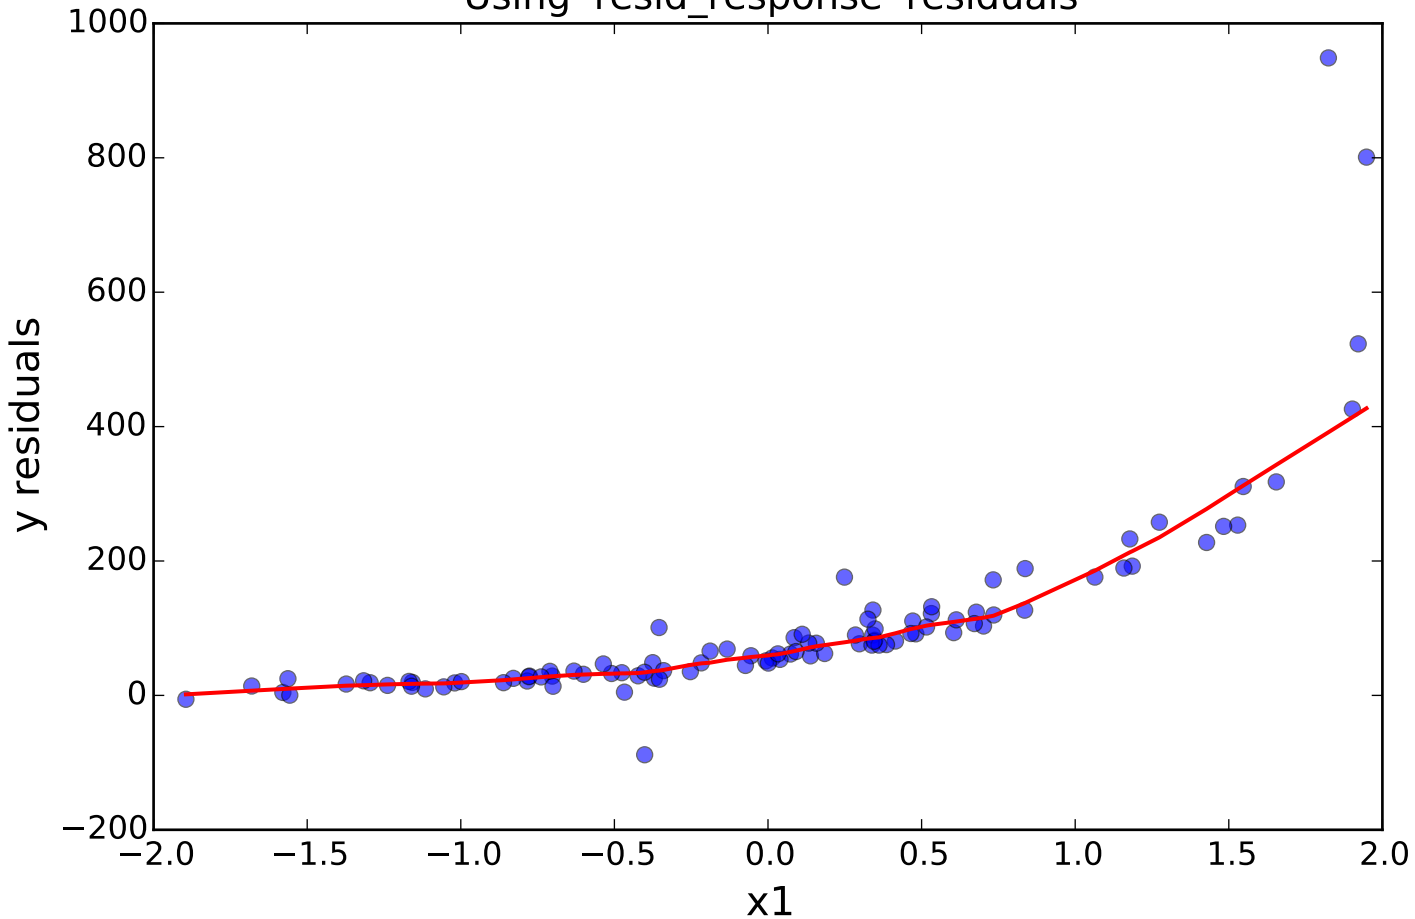

Added variable plot (called as method)

Poisson regression

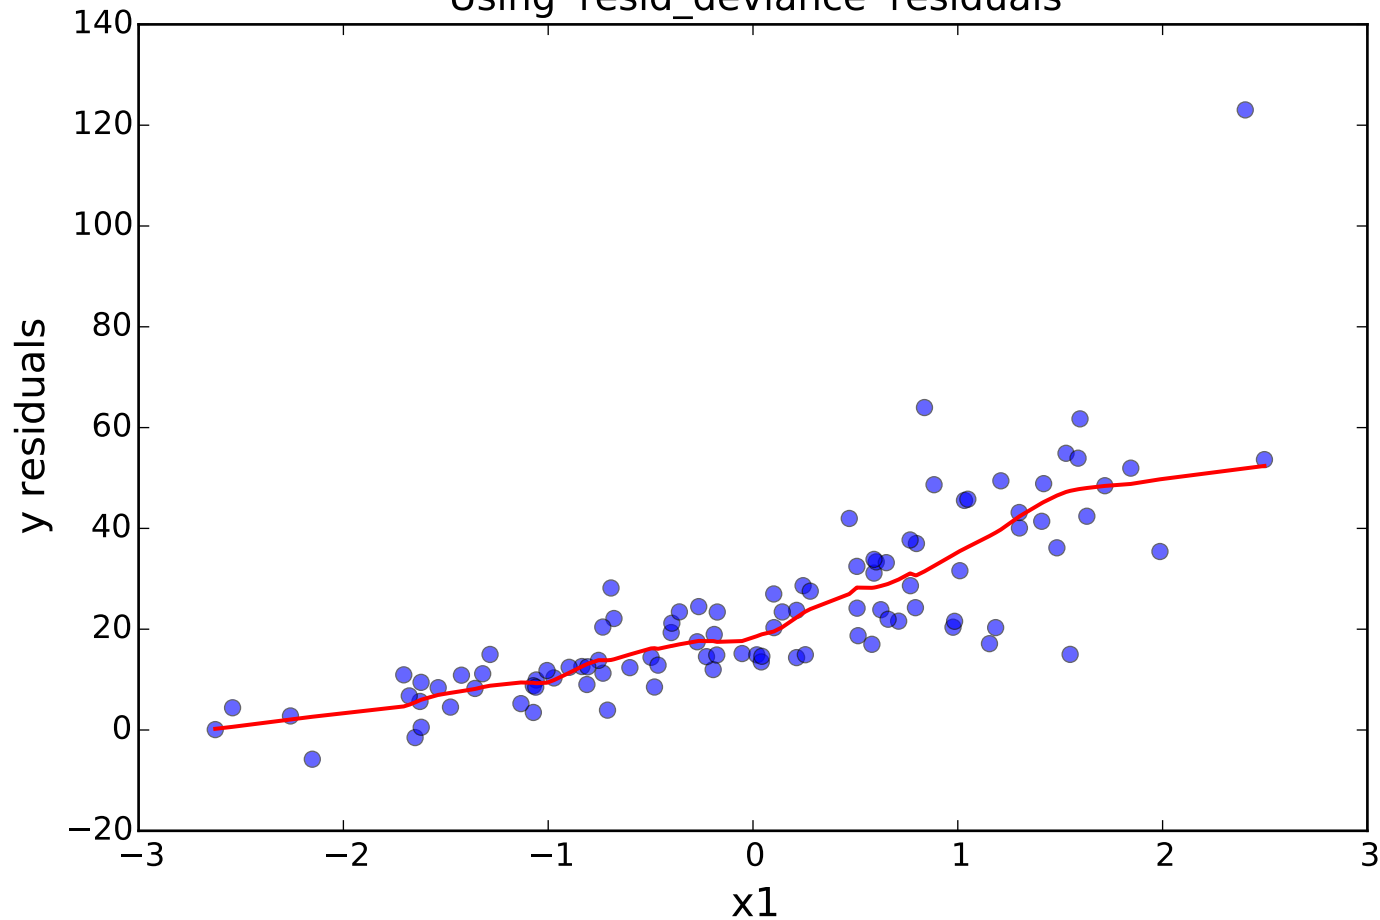

Linear effect, slope=1

Unweighted

Using 'resid\_response' residuals

Added variable plot  
Poisson regression  
Linear effect, slope=1  
Weighted  
Using 'resid\_deviance' residuals

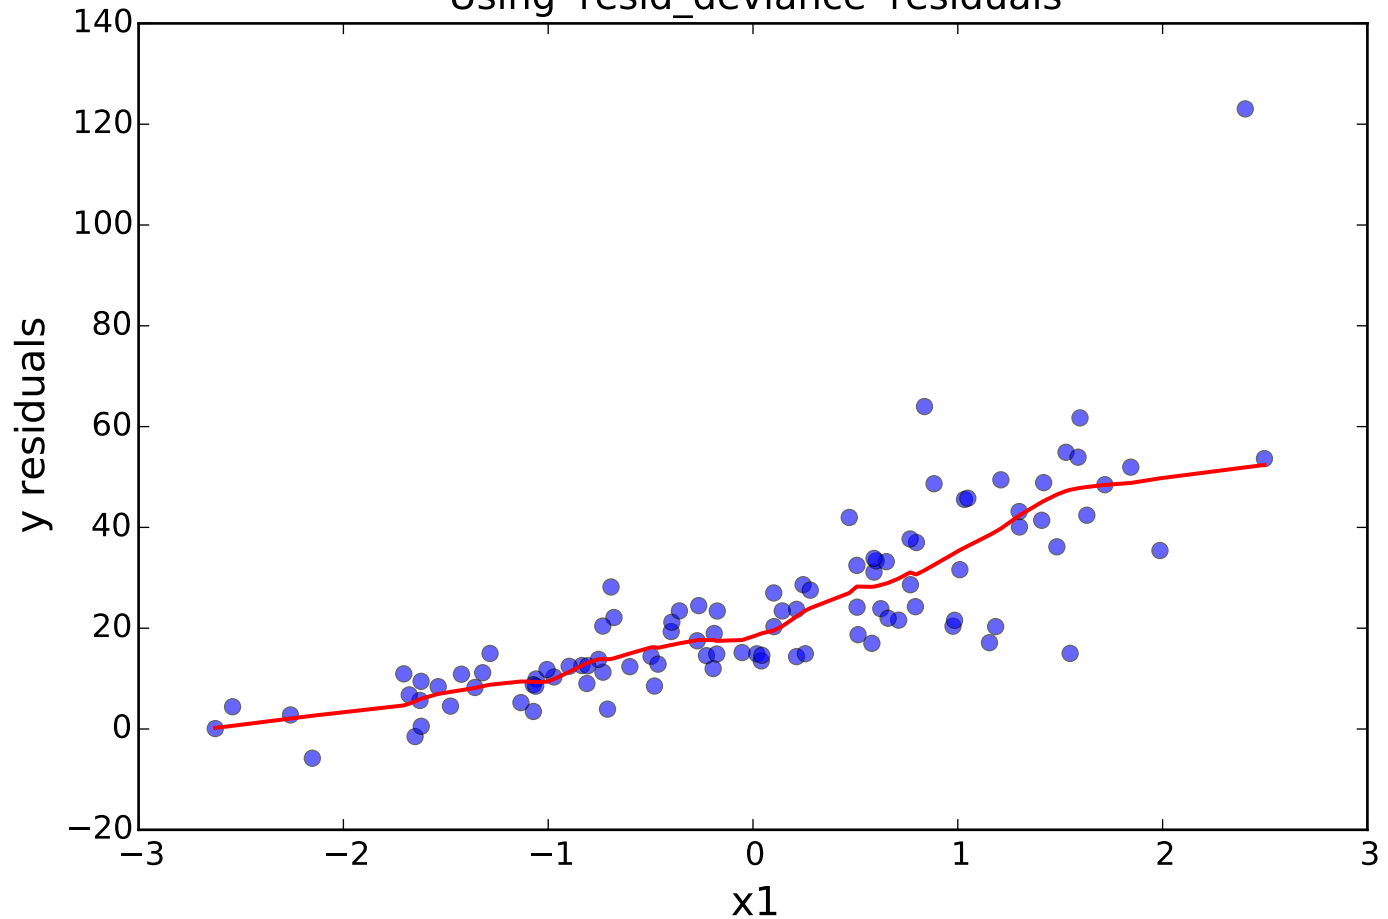

Added variable plot (called as method)

Poisson regression

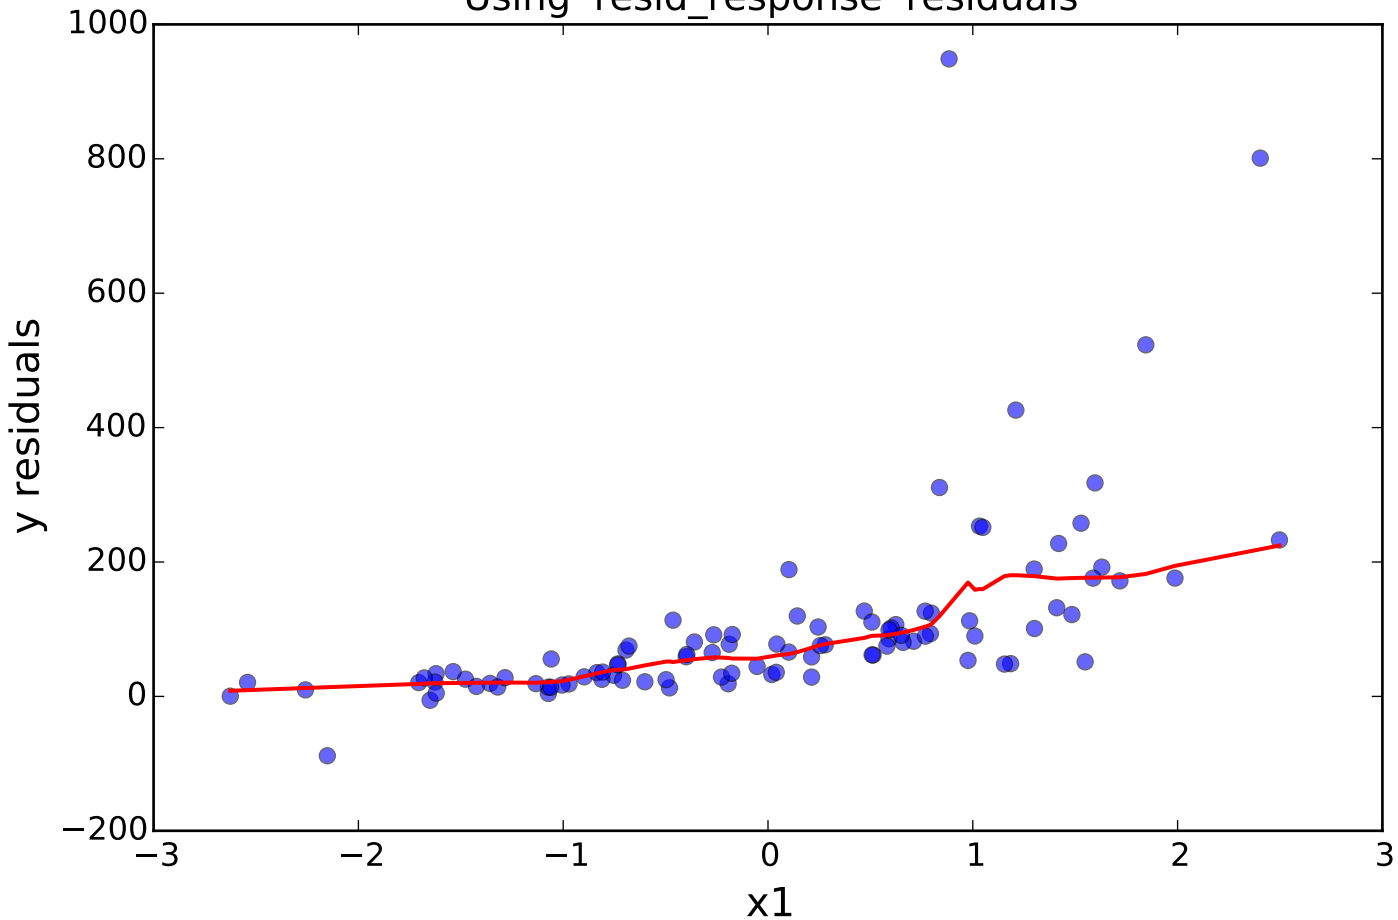

Linear effect, slope=1

Weighted

Using 'resid\_deviance' residuals

Added variable plot  
Poisson regression  
Linear effect, slope=1  
Weighted  
Using 'resid\_response' residuals

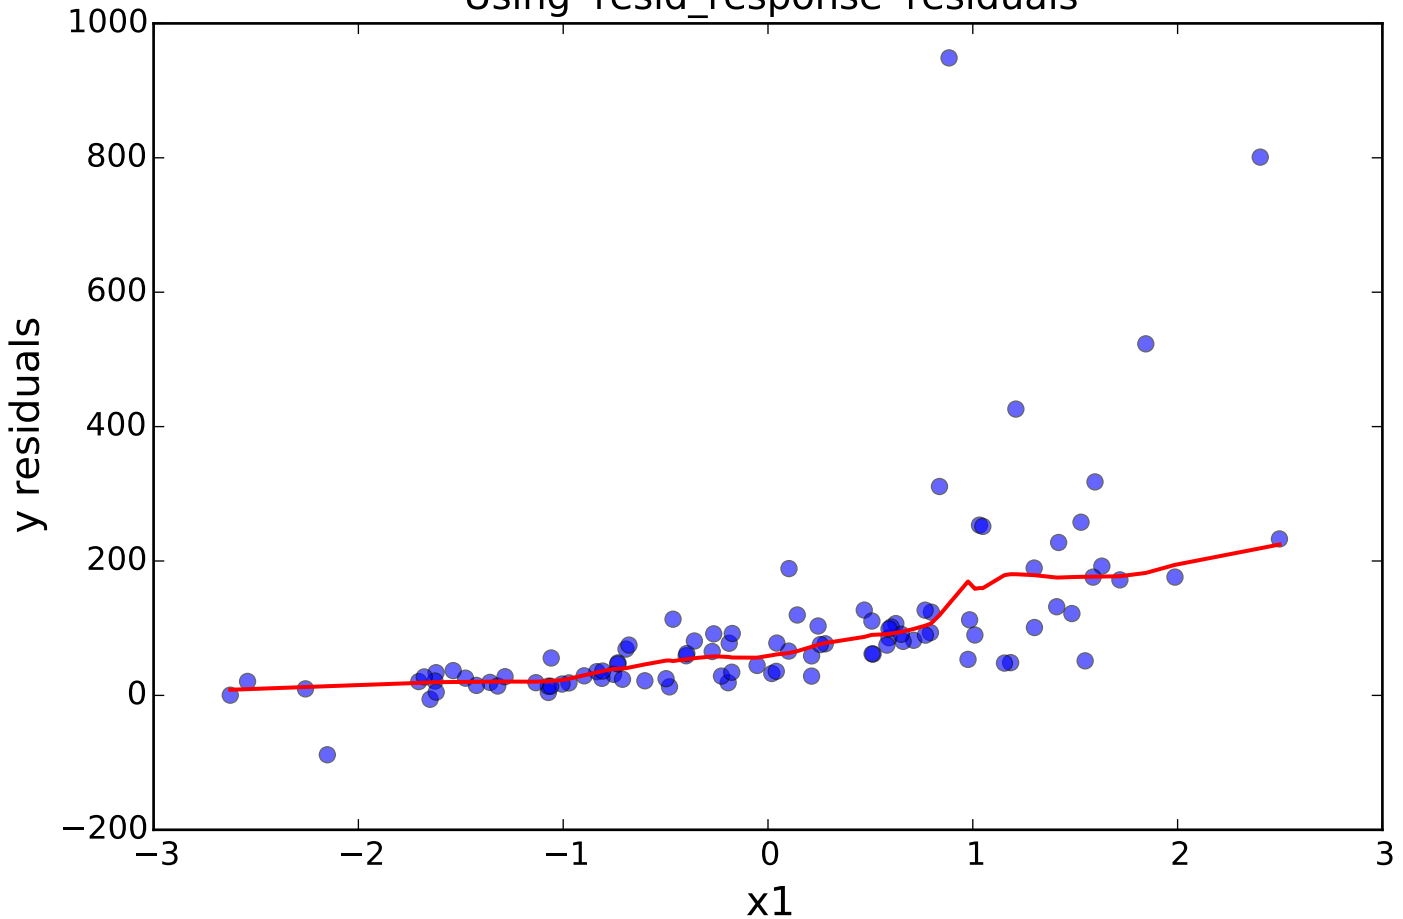

Added variable plot (called as method)

Poisson regression

Linear effect, slope=1

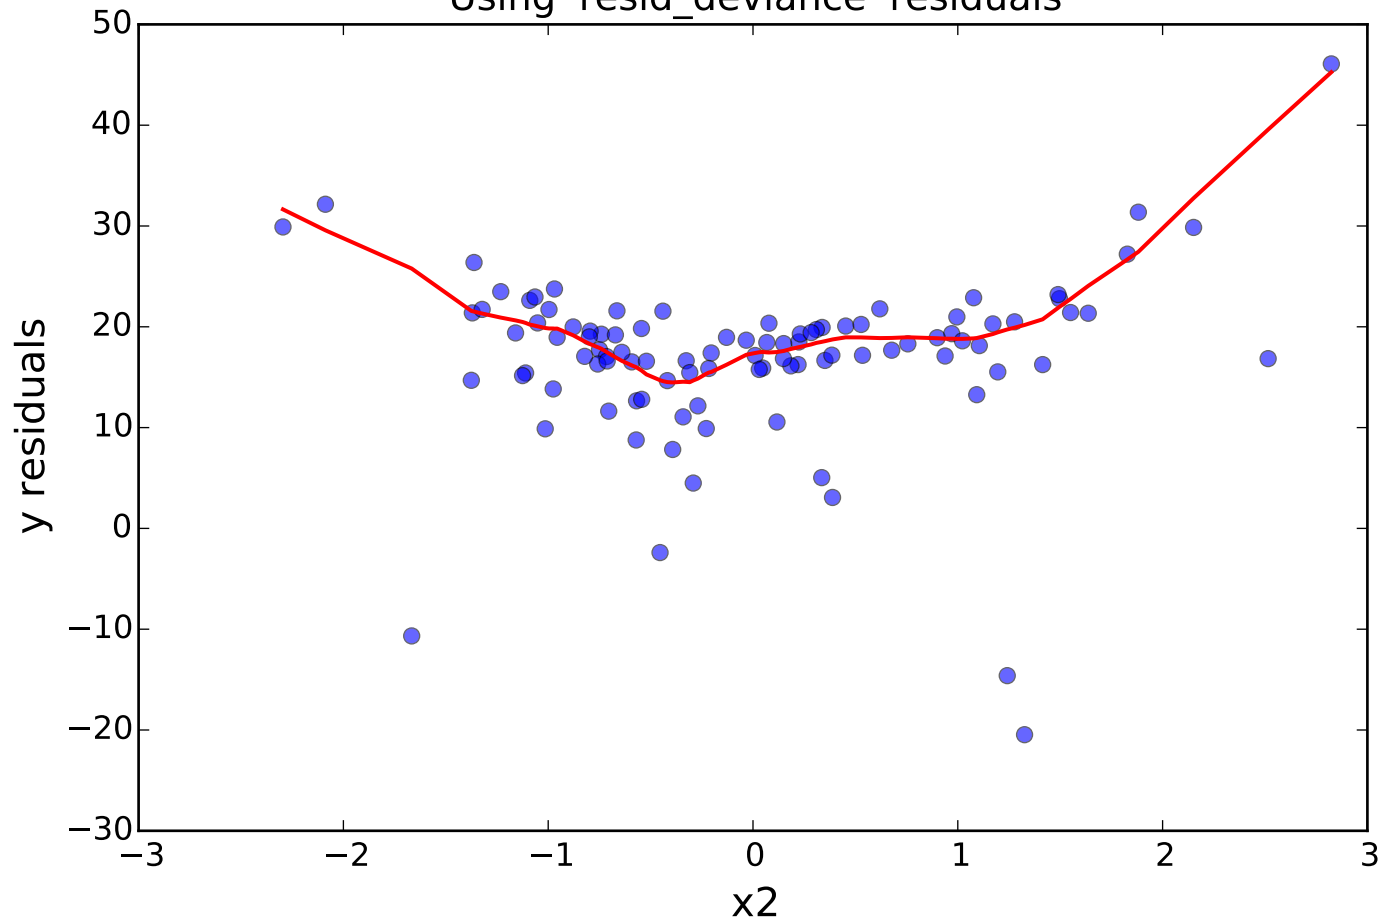

Weighted

Using 'resid\_response' residuals

Added variable plot  
Poisson regression  
Quadratic effect  
Unweighted  
Using 'resid\_deviance' residuals

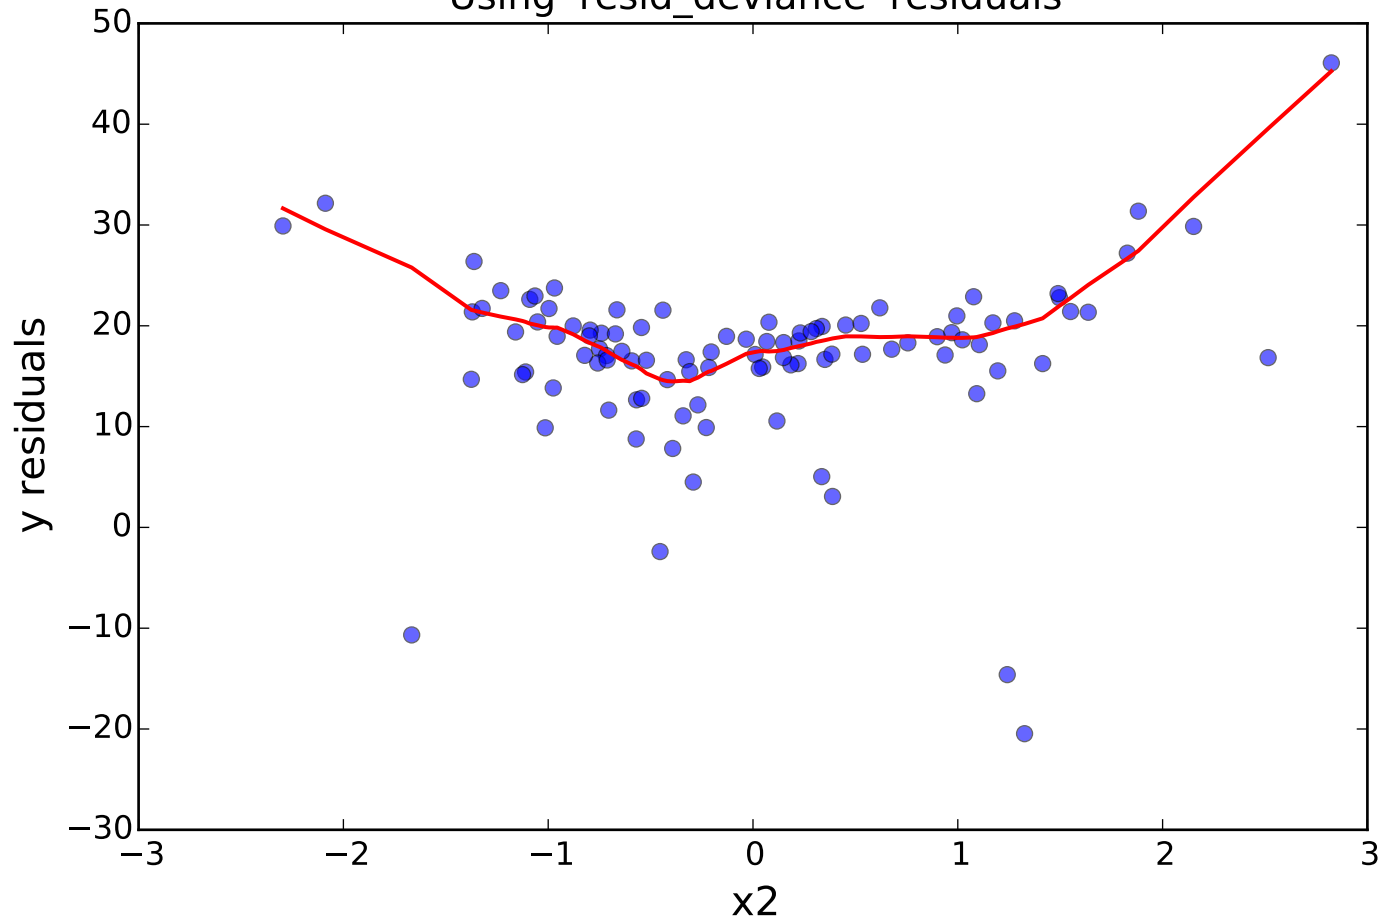

Added variable plot (called as method)

Poisson regression

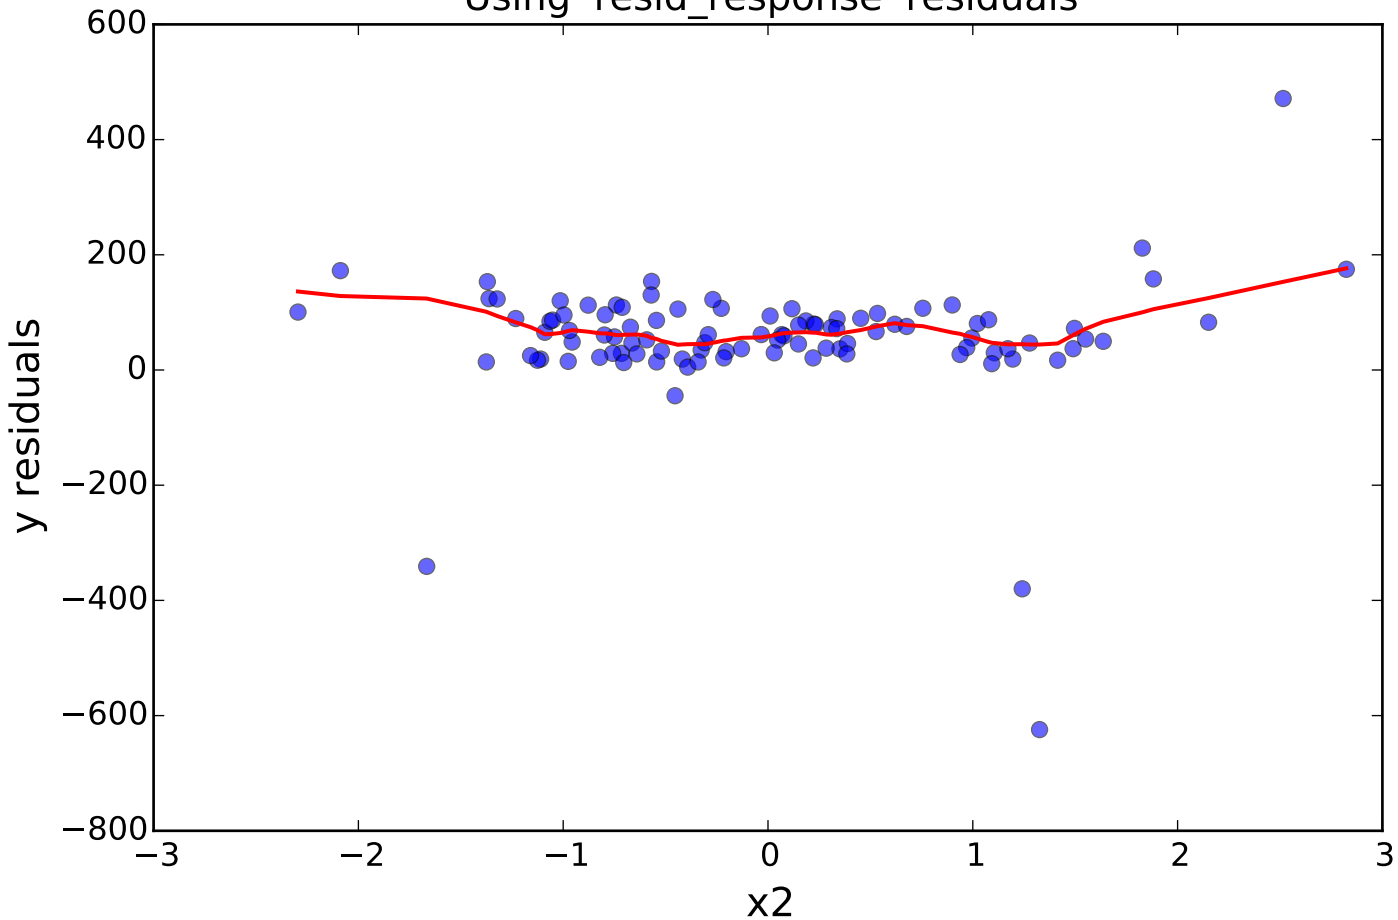

Quadratic effect

Unweighted

Using 'resid\_deviance' residuals

Added variable plot  
Poisson regression  
Quadratic effect  
Unweighted  
Using 'resid\_response' residuals

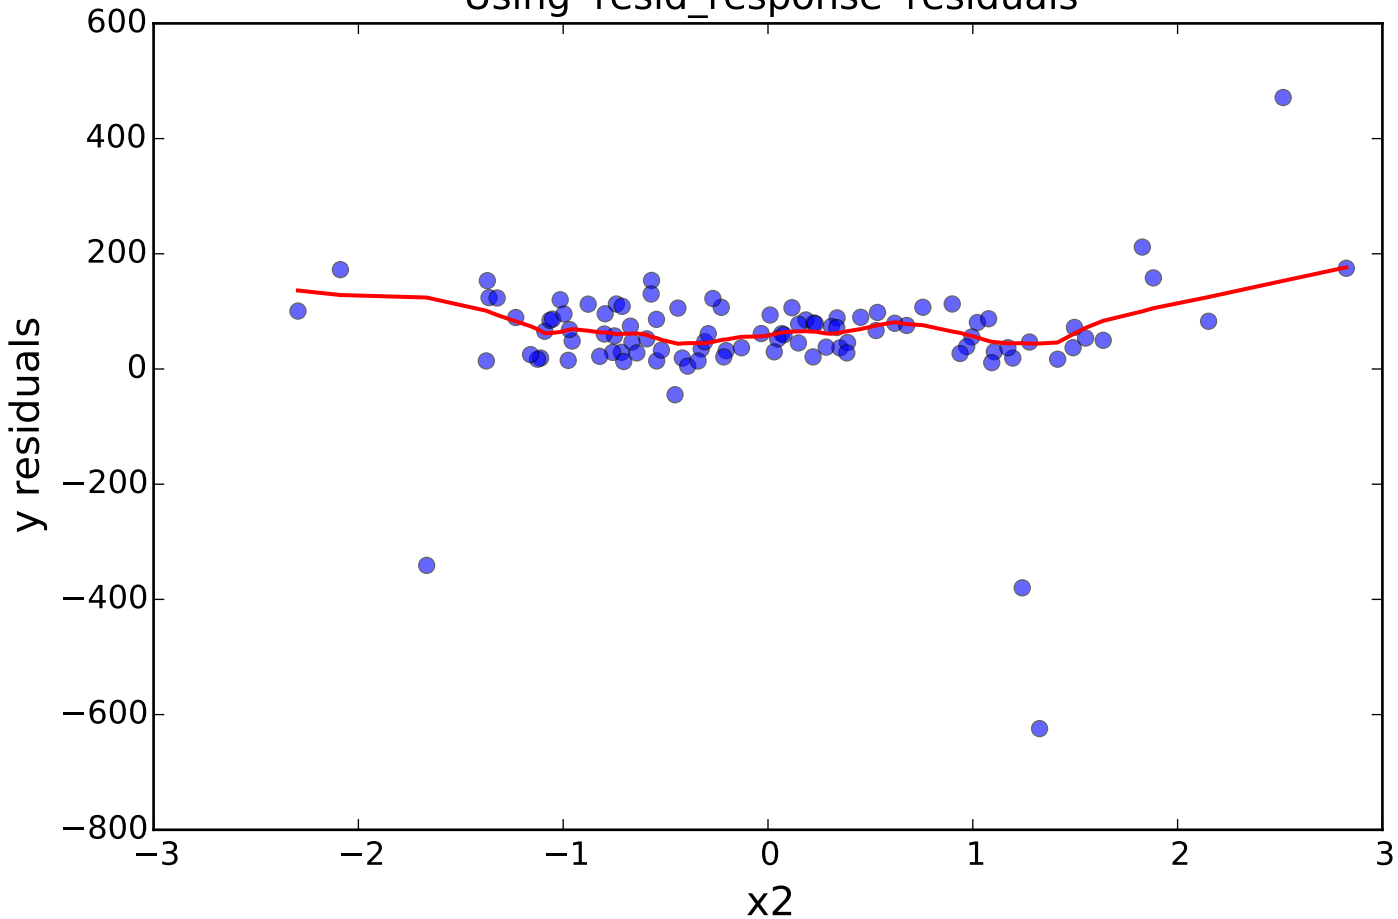

Added variable plot (called as method)

Poisson regression

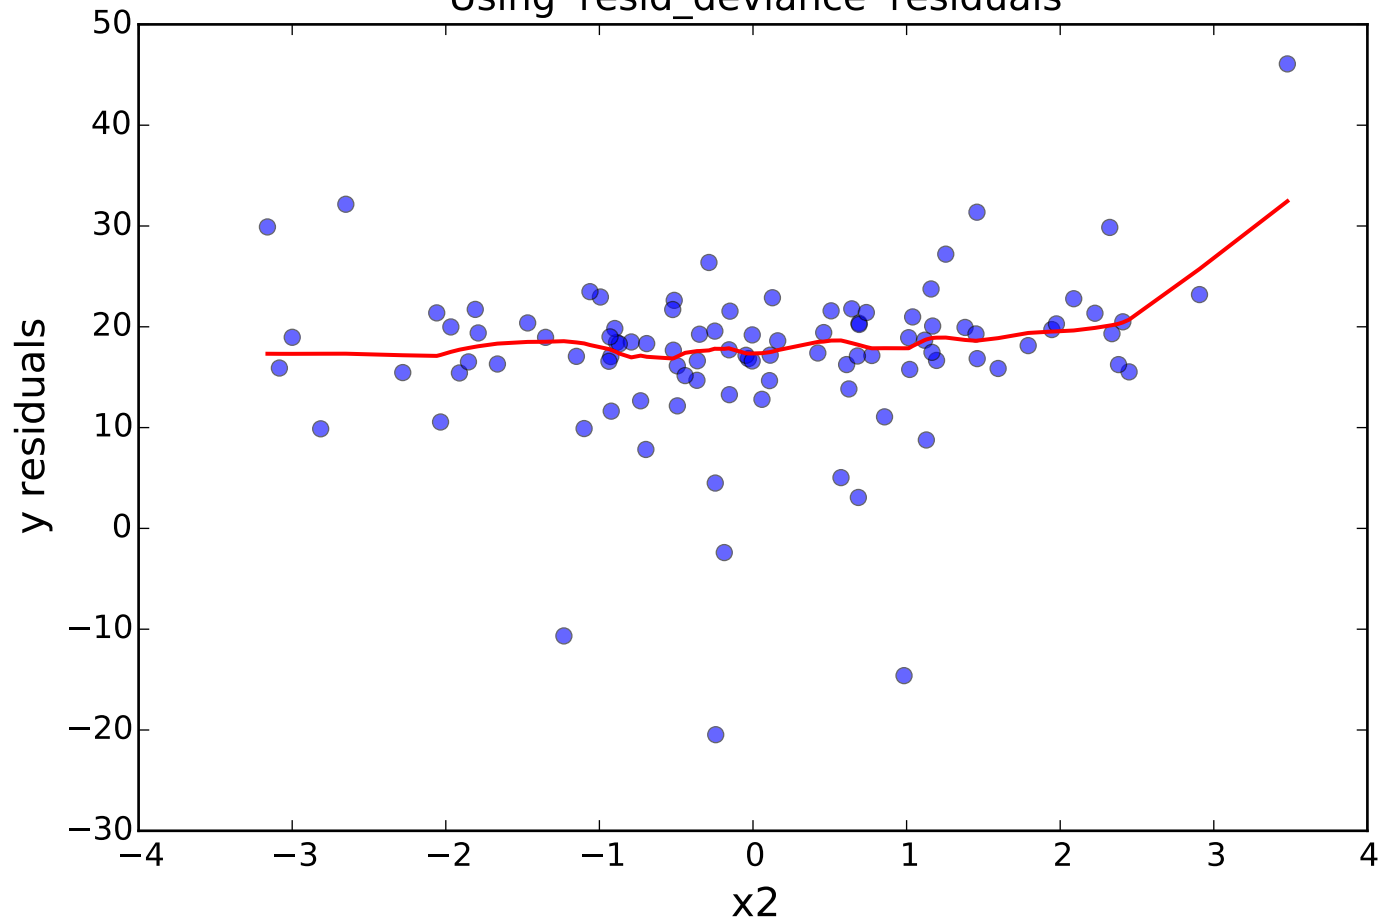

Quadratic effect

Unweighted

Using 'resid\_response' residuals

Added variable plot  
Poisson regression  
Quadratic effect  
Weighted  
Using 'resid\_deviance' residuals

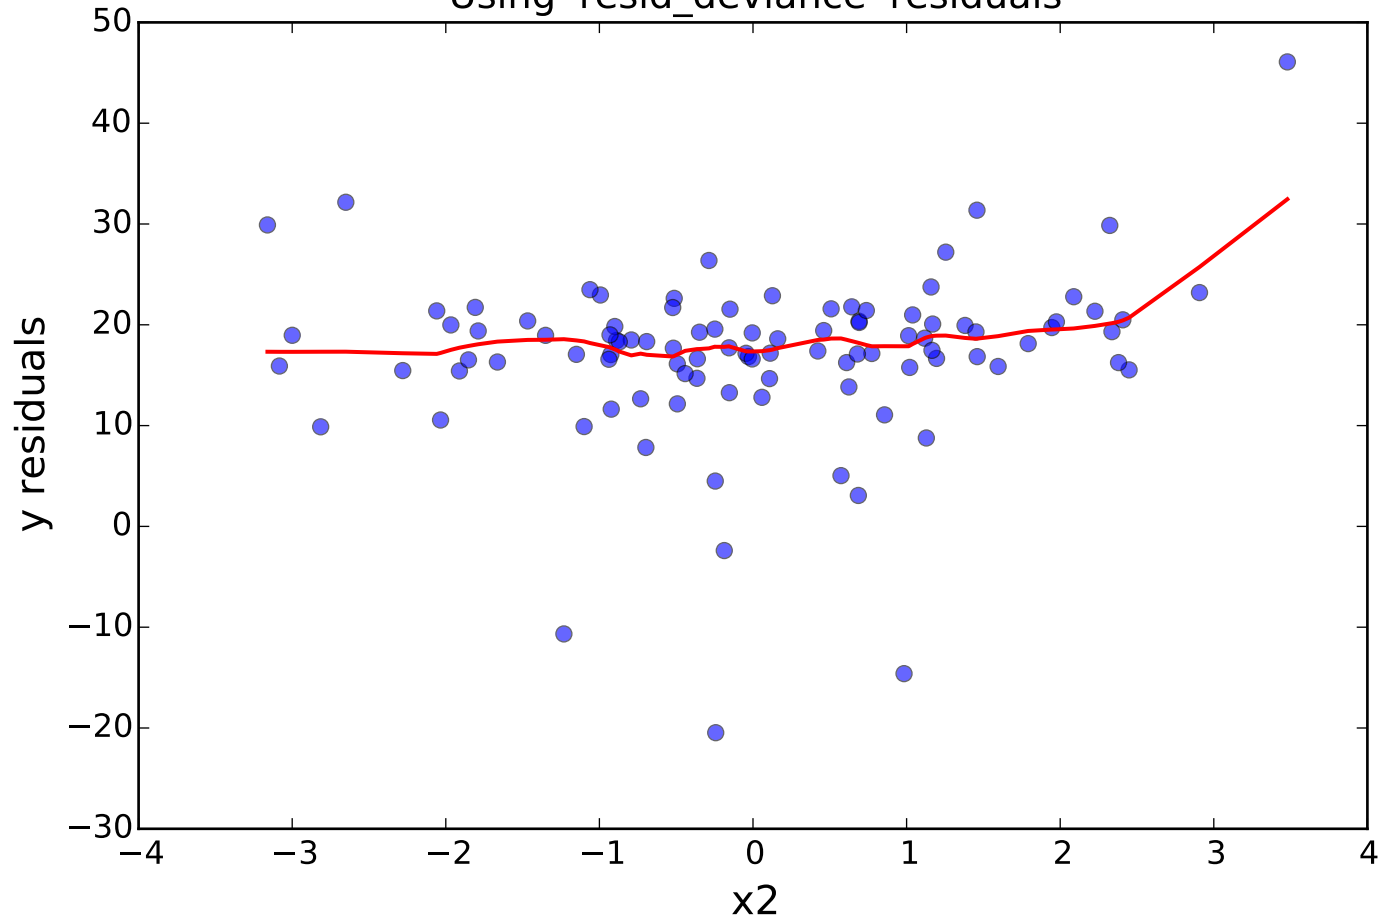

Added variable plot (called as method)

Poisson regression

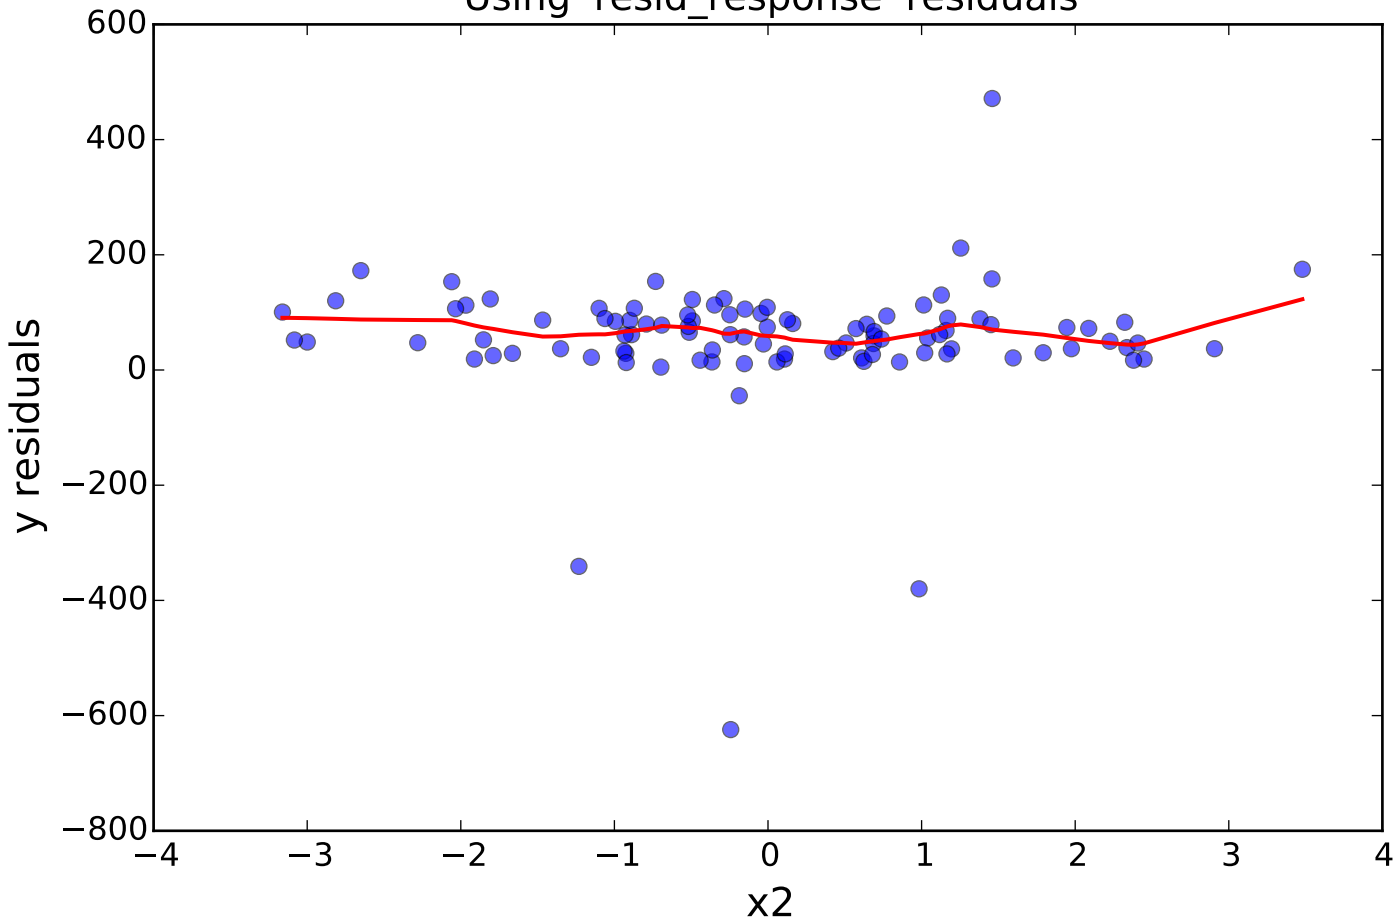

Quadratic effect

Weighted

Using 'resid\_deviance' residuals

Added variable plot  
Poisson regression  
Quadratic effect  
Weighted  
Using 'resid\_response' residuals

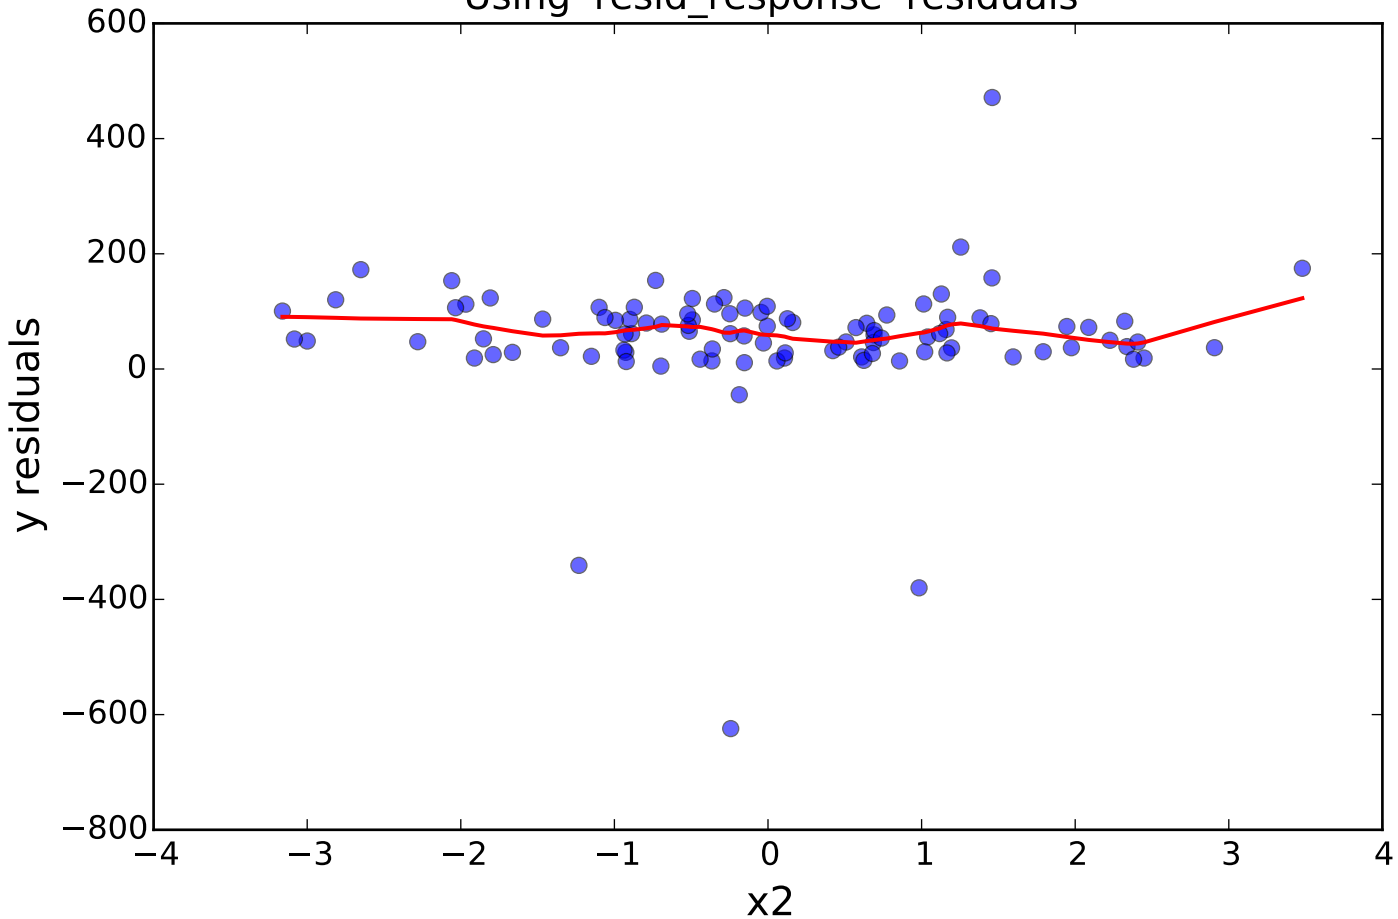

Added variable plot (called as method)

Poisson regression

Quadratic effect

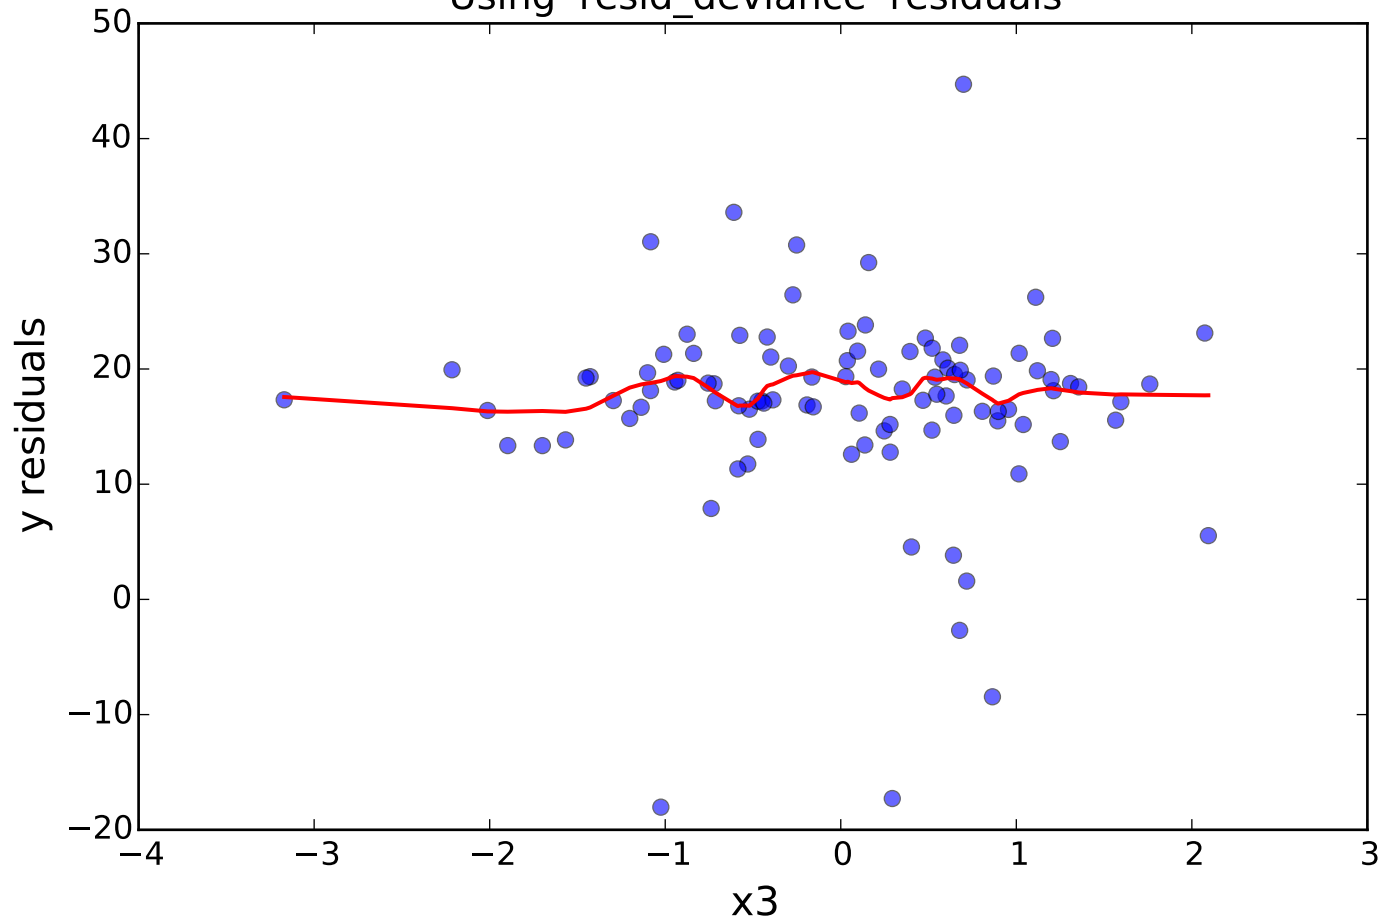

Weighted

Using 'resid\_response' residuals

Added variable plot  
Poisson regression  
No effect  
Unweighted  
Using 'resid\_deviance' residuals

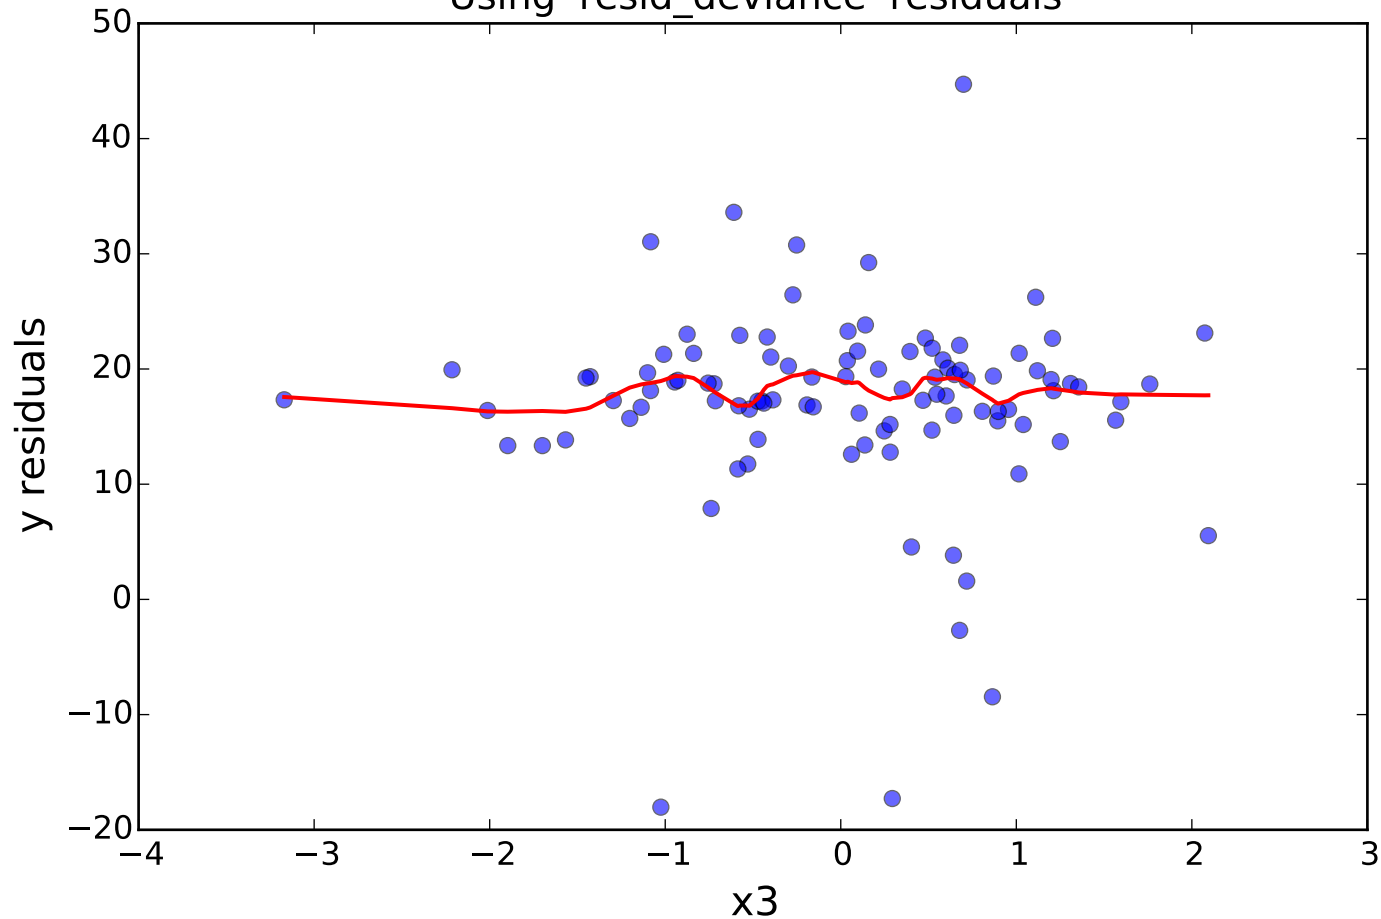

Added variable plot (called as method)

Poisson regression

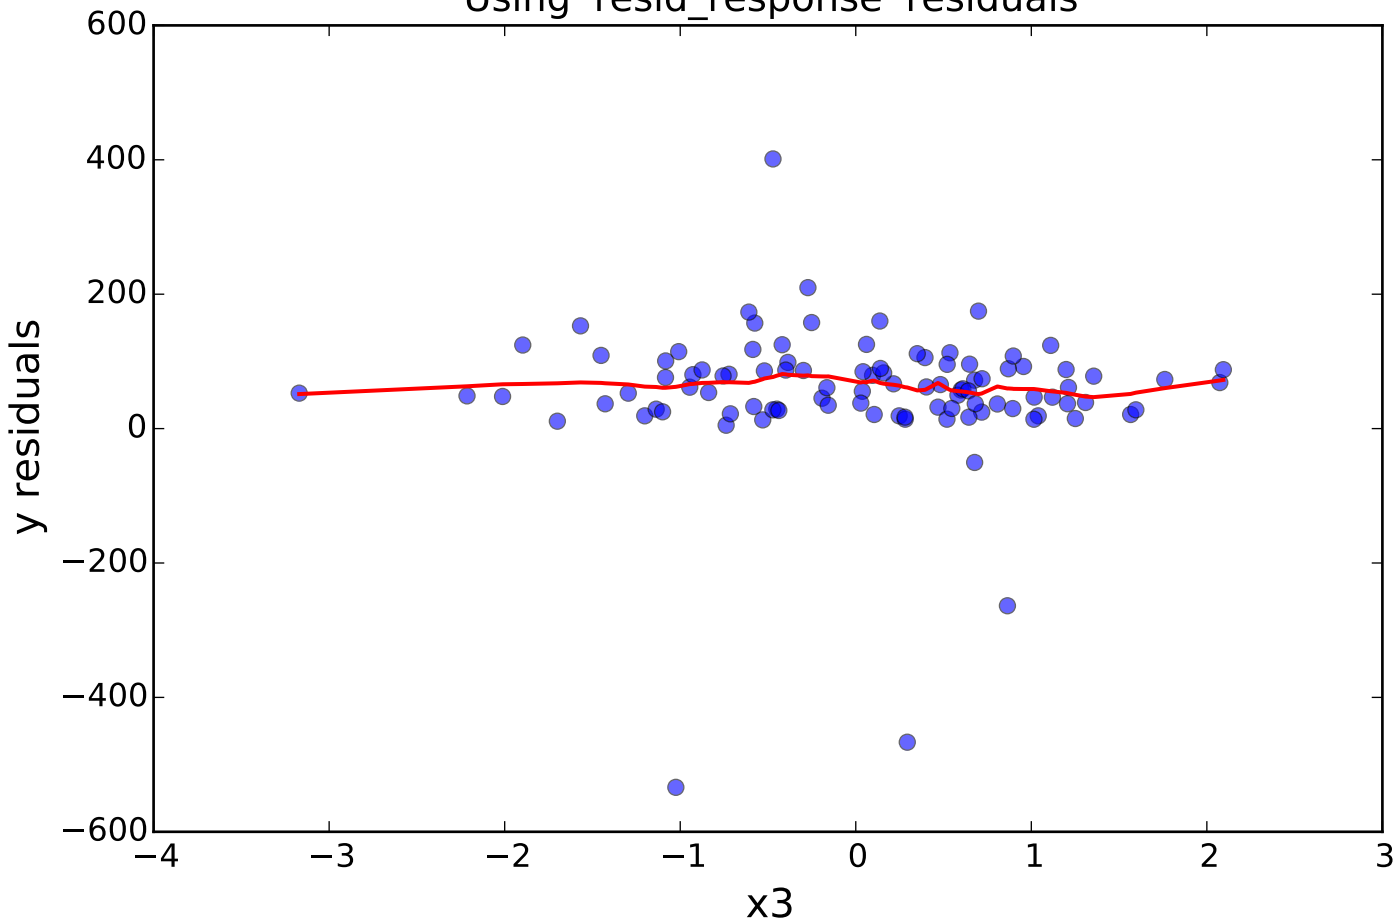

No effect

Unweighted

Using 'resid\_deviance' residuals

Added variable plot  
Poisson regression  
No effect  
Unweighted  
Using 'resid\_response' residuals

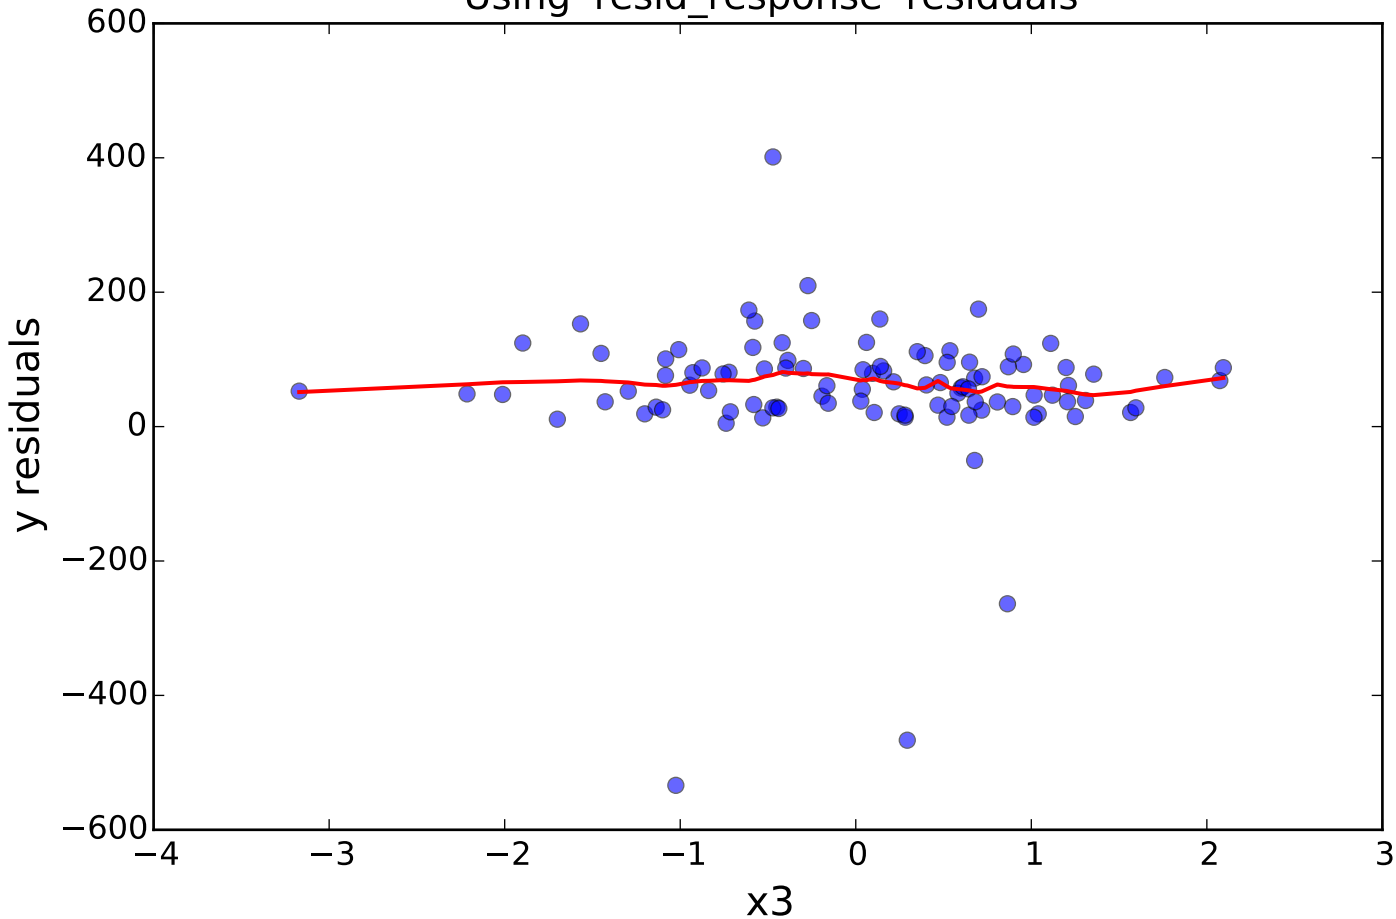

Added variable plot (called as method)

Poisson regression

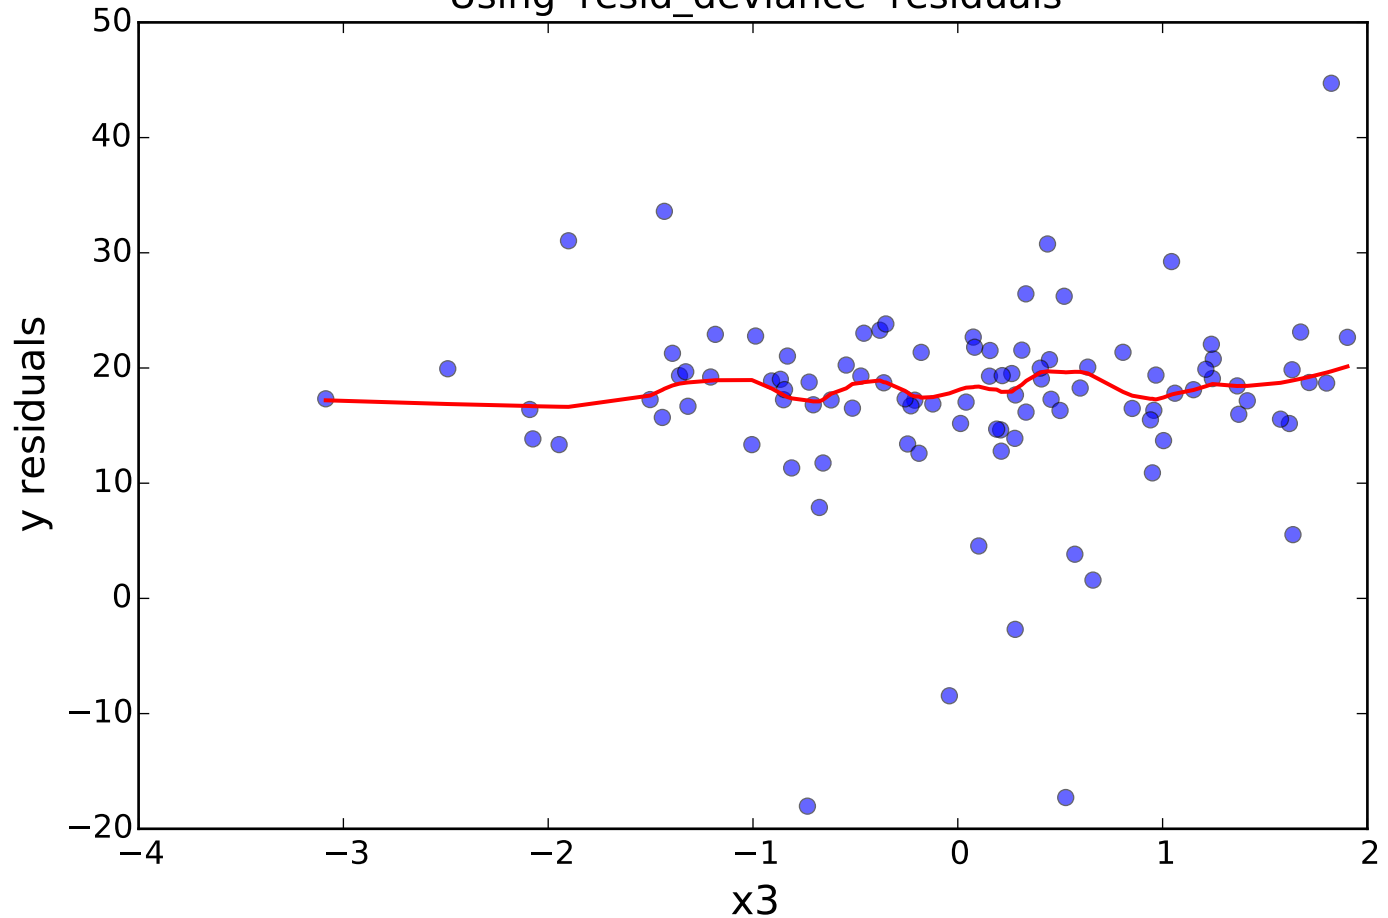

No effect

Unweighted

Using 'resid\_response' residuals

Added variable plot  
Poisson regression  
No effect  
Weighted  
Using 'resid\_deviance' residuals

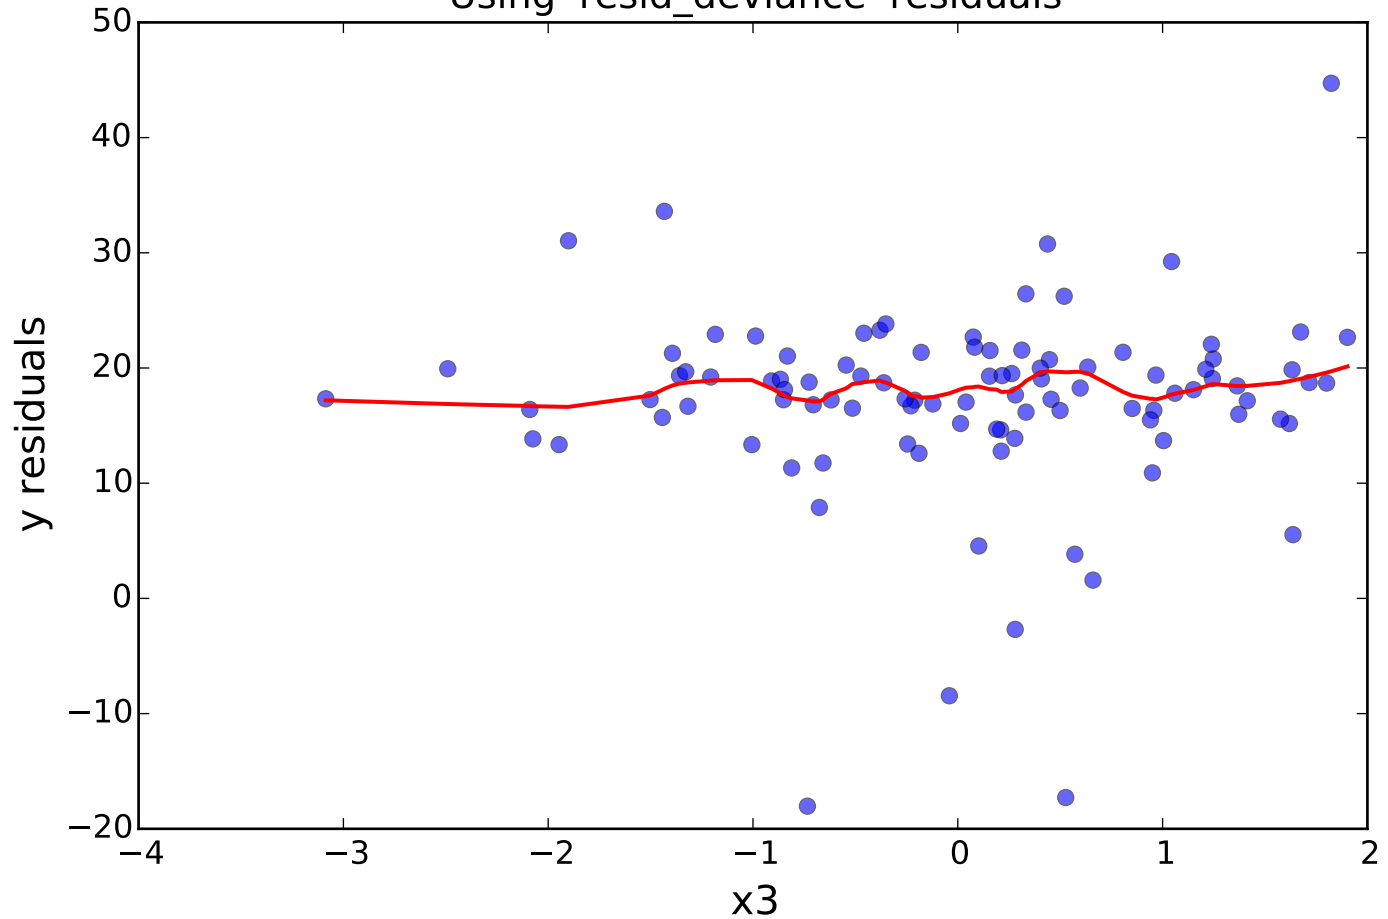

Added variable plot (called as method)

Poisson regression

No effect

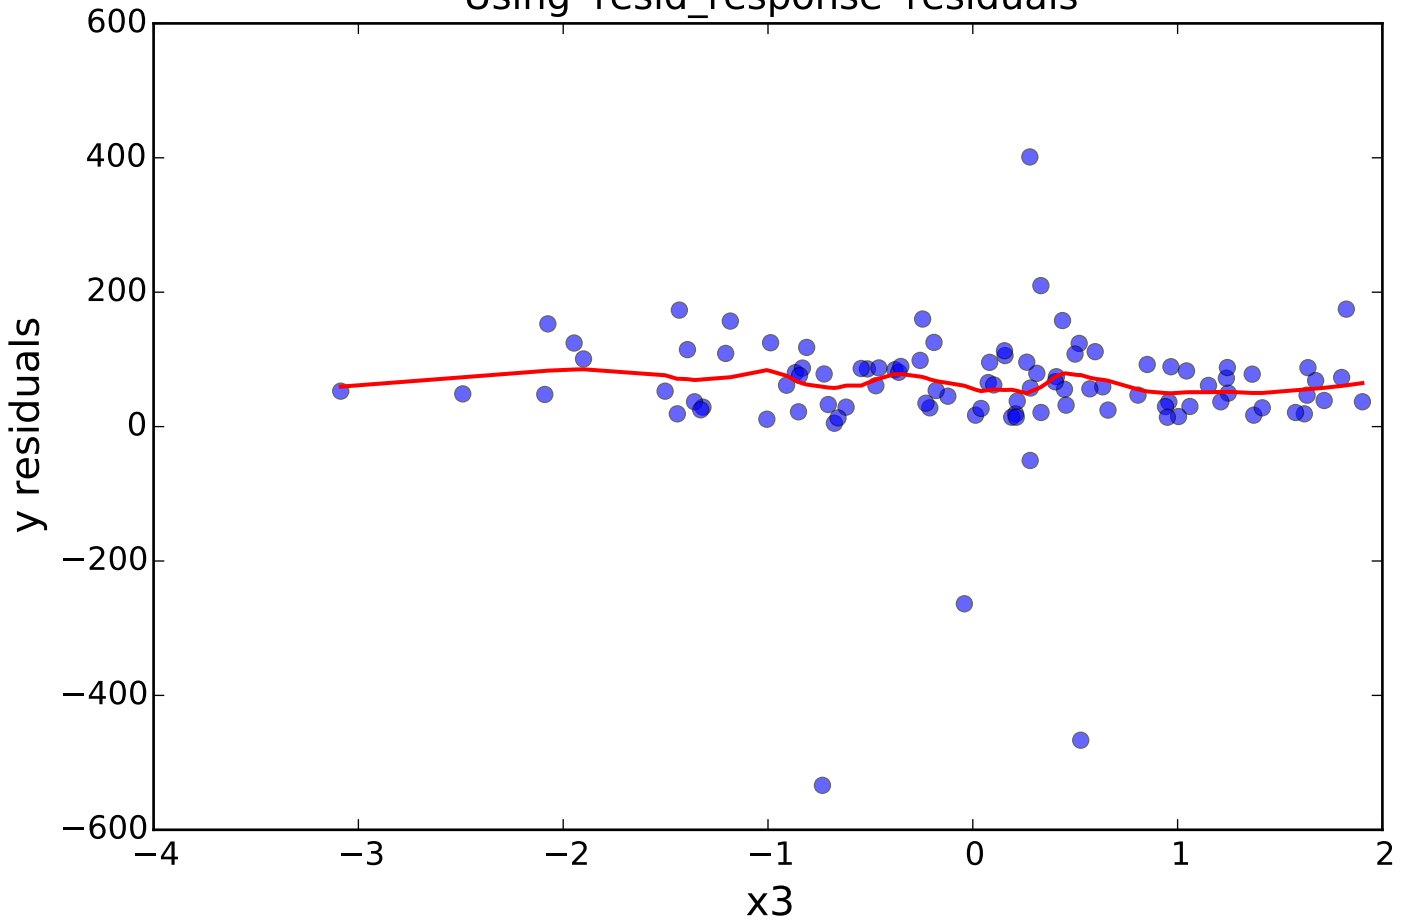

Weighted

Using 'resid\_deviance' residuals

Added variable plot  
Poisson regression  
No effect  
Weighted

Using 'resid\_response' residuals

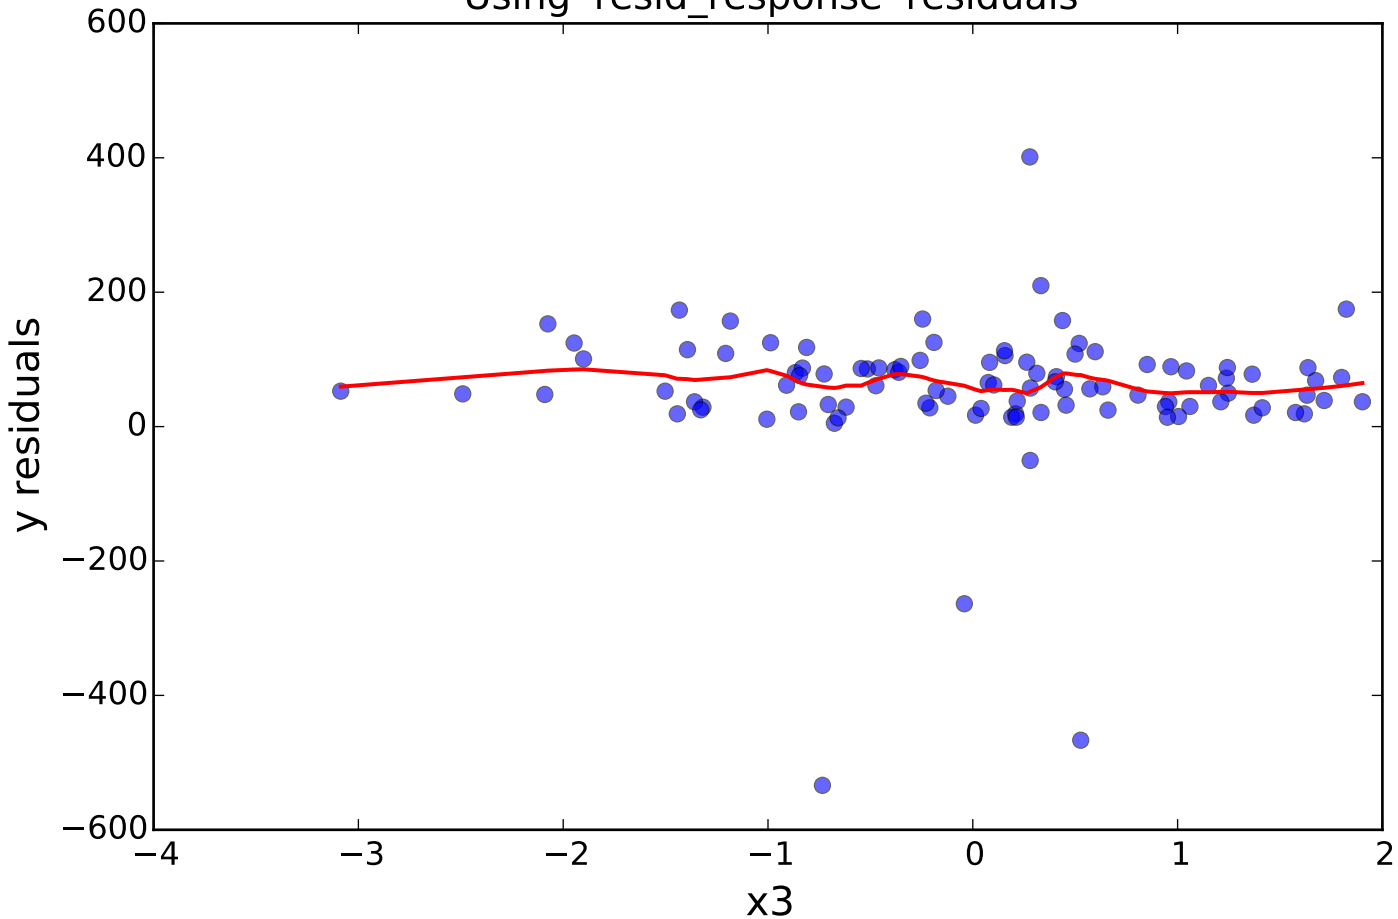

Added variable plot (called as method)

Poisson regression

No effect

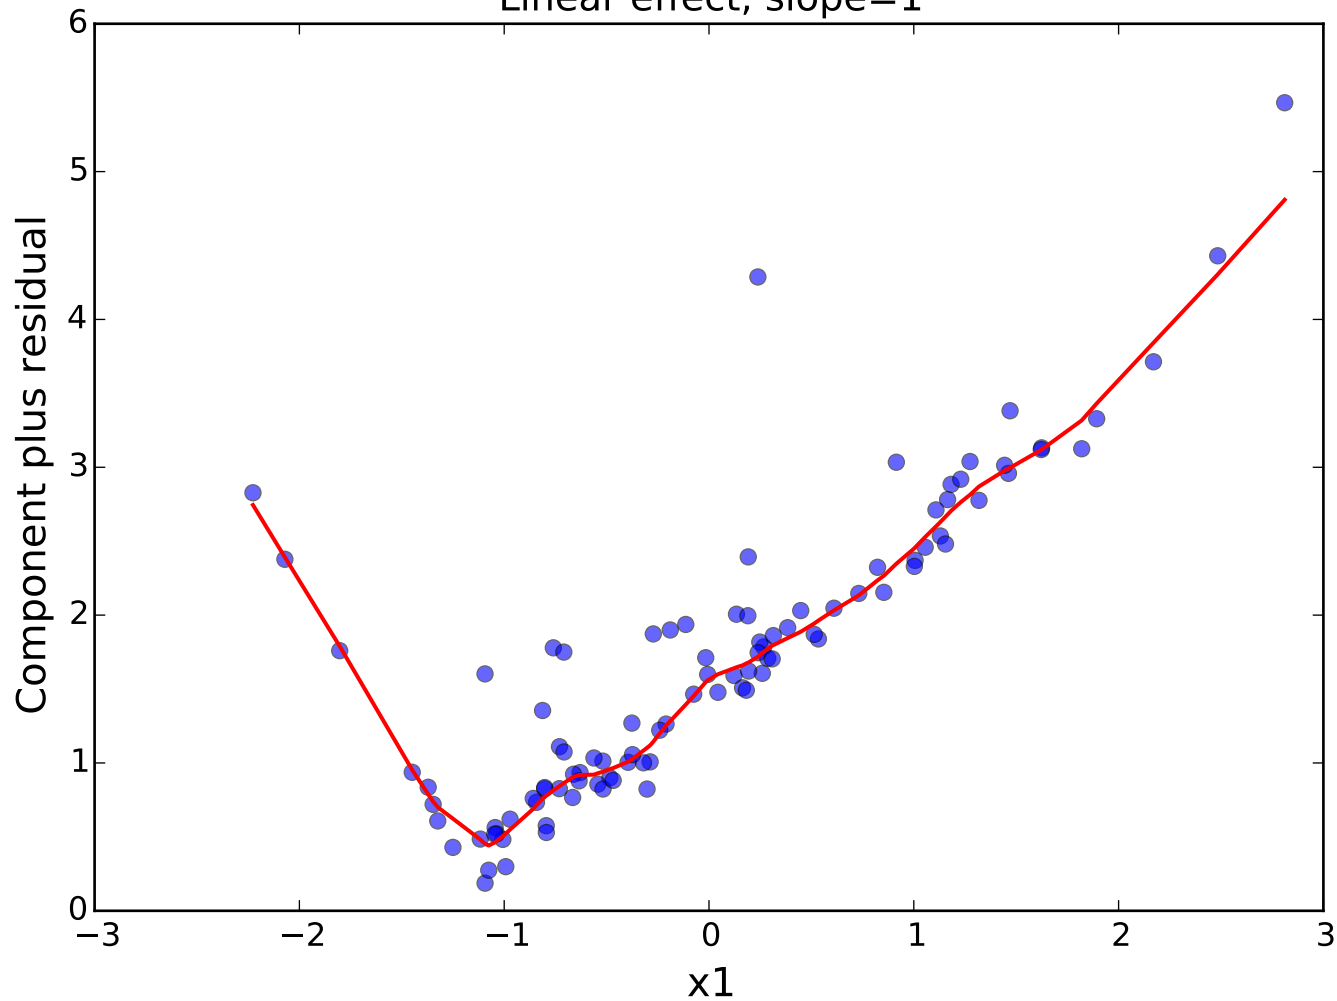

Weighted

Using 'resid\_response' residuals

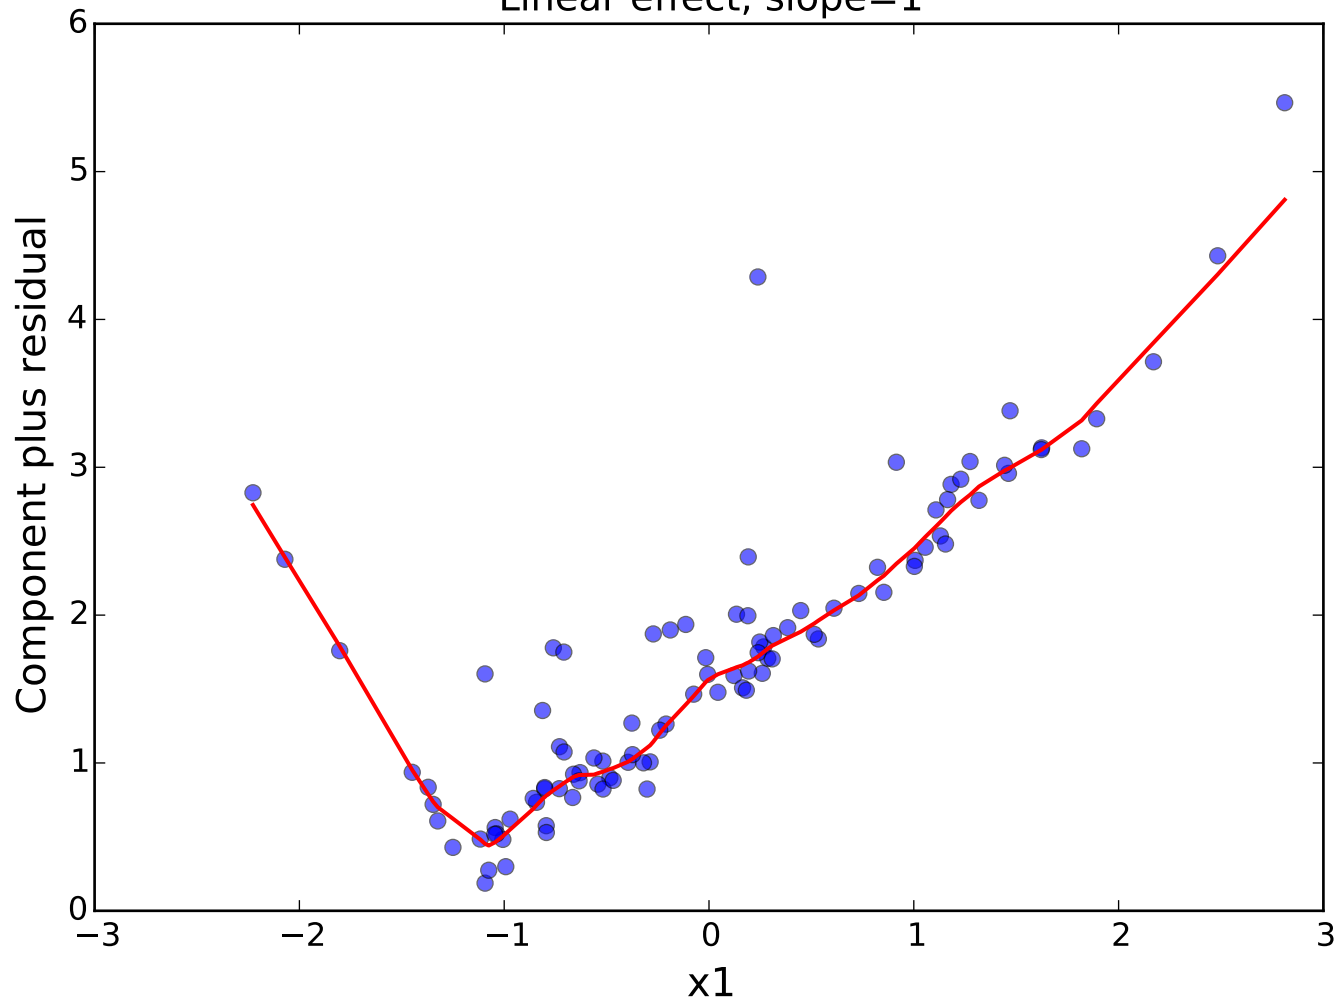

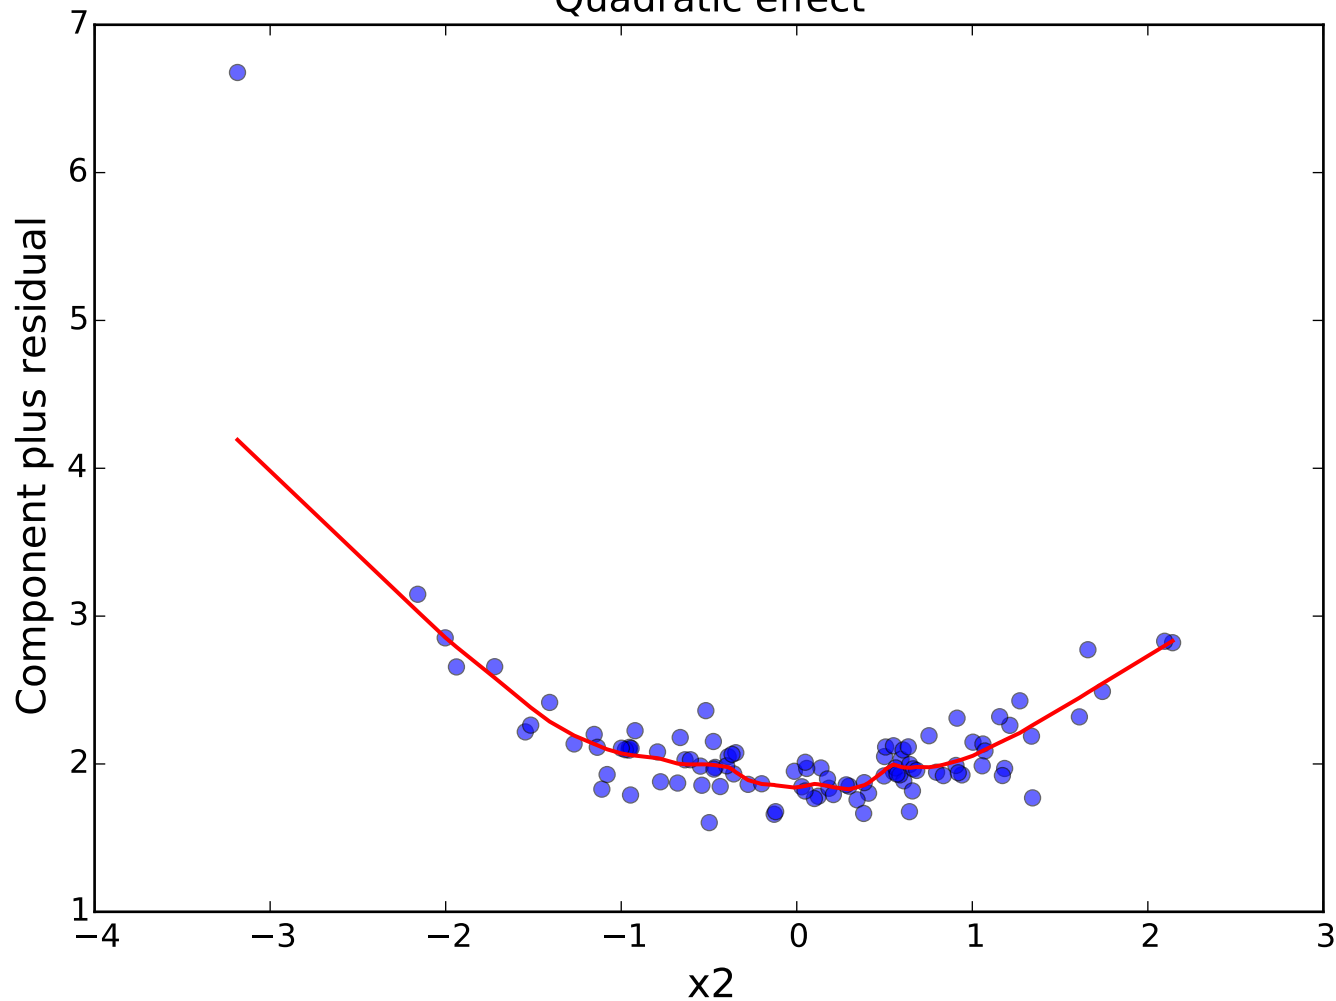

CERES plot  
Poisson regression  
Linear effect, slope=1

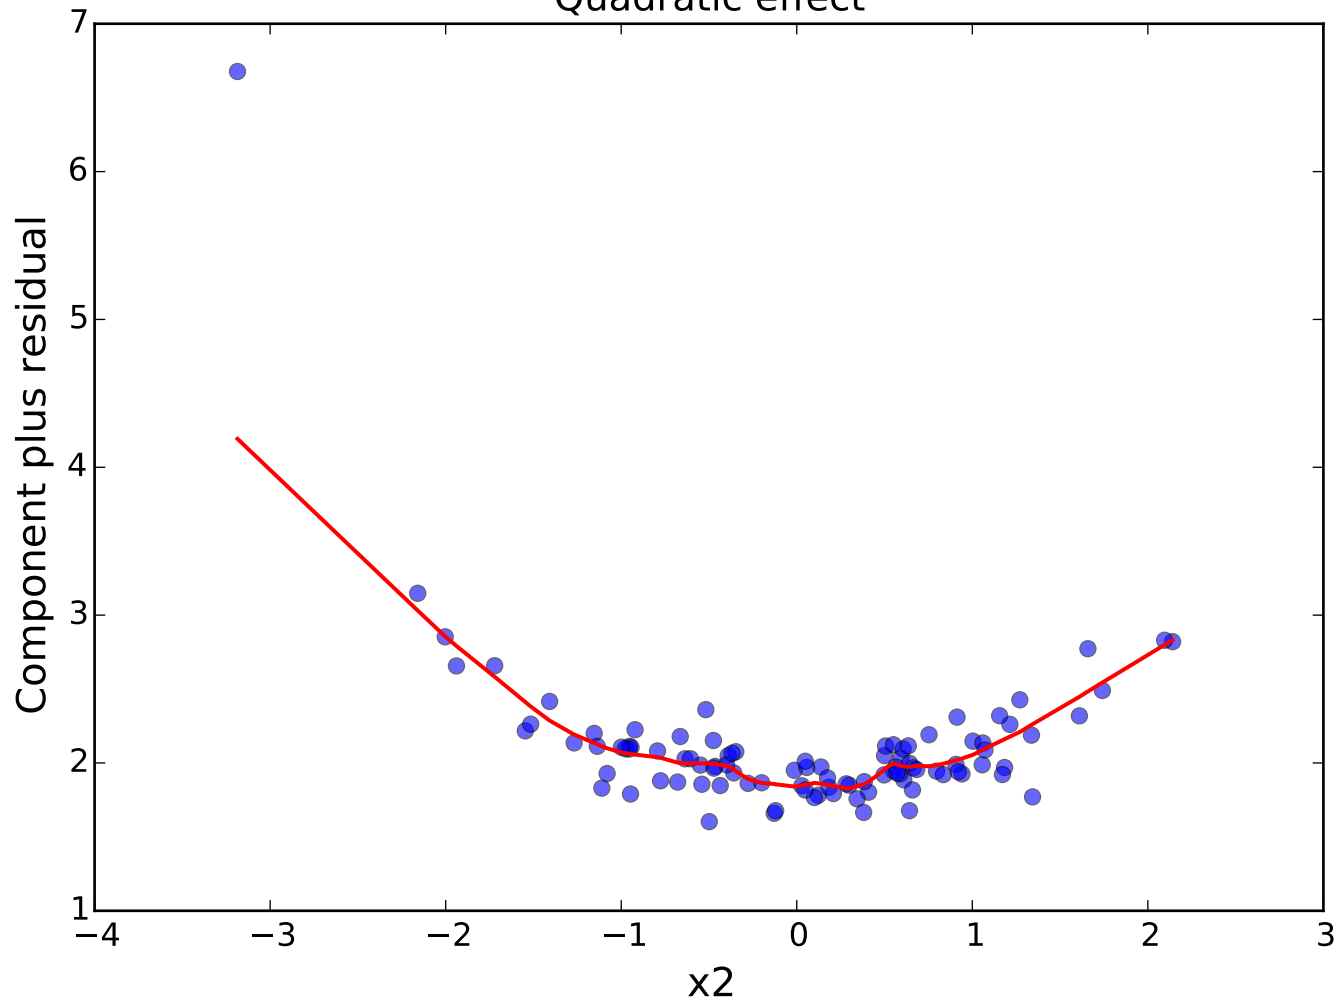

CERES plot (called as method)  
Poisson regression  
Linear effect, slope=1

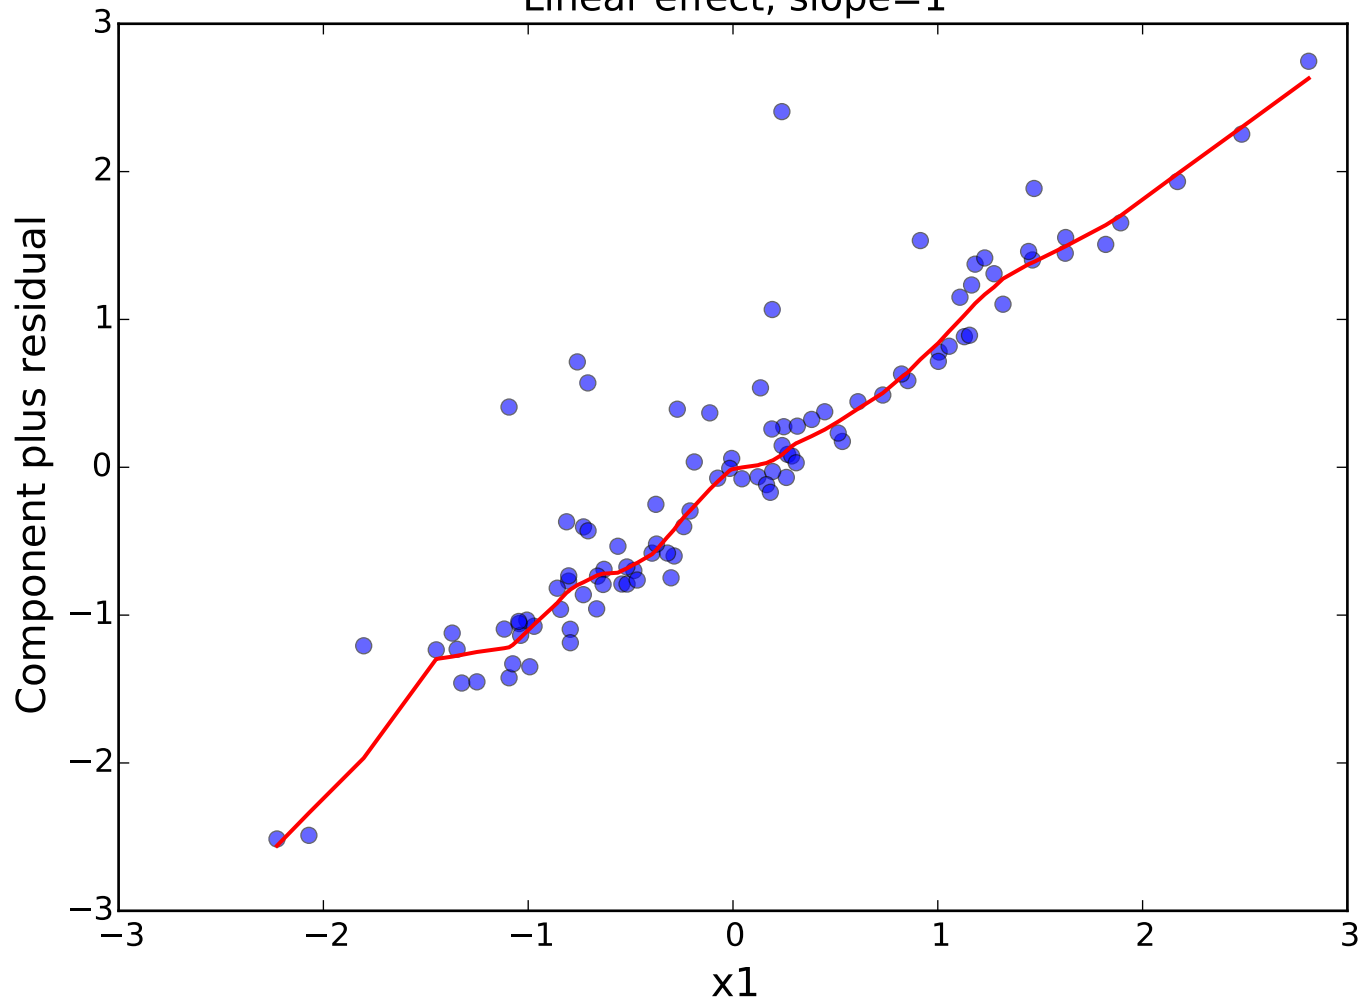

CERES plot  
Poisson regression  
Quadratic effect

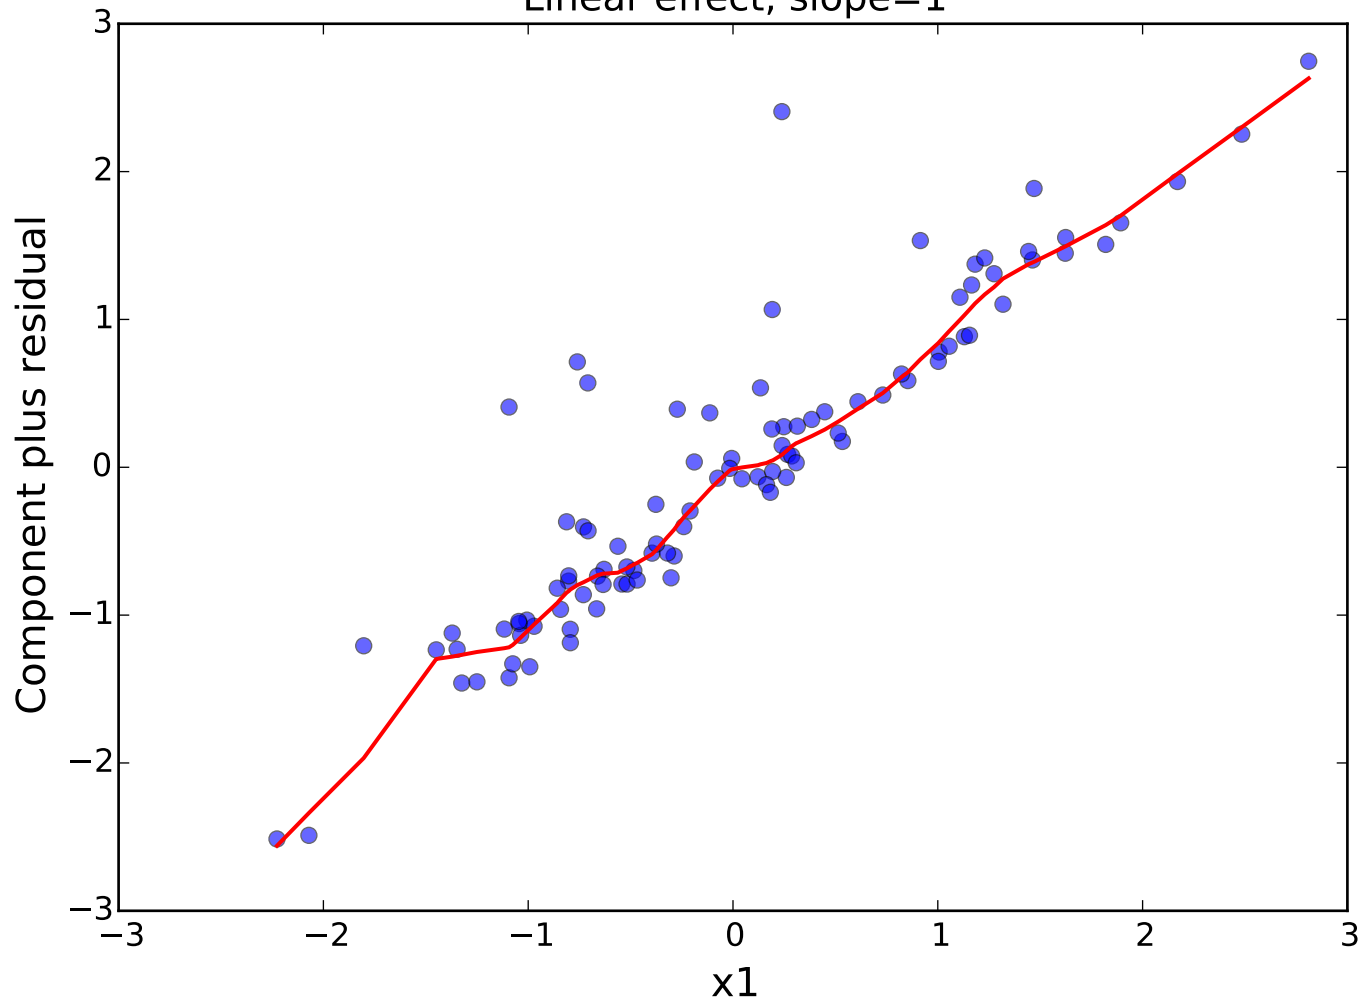

CERES plot (called as method)  
Poisson regression  
Quadratic effect

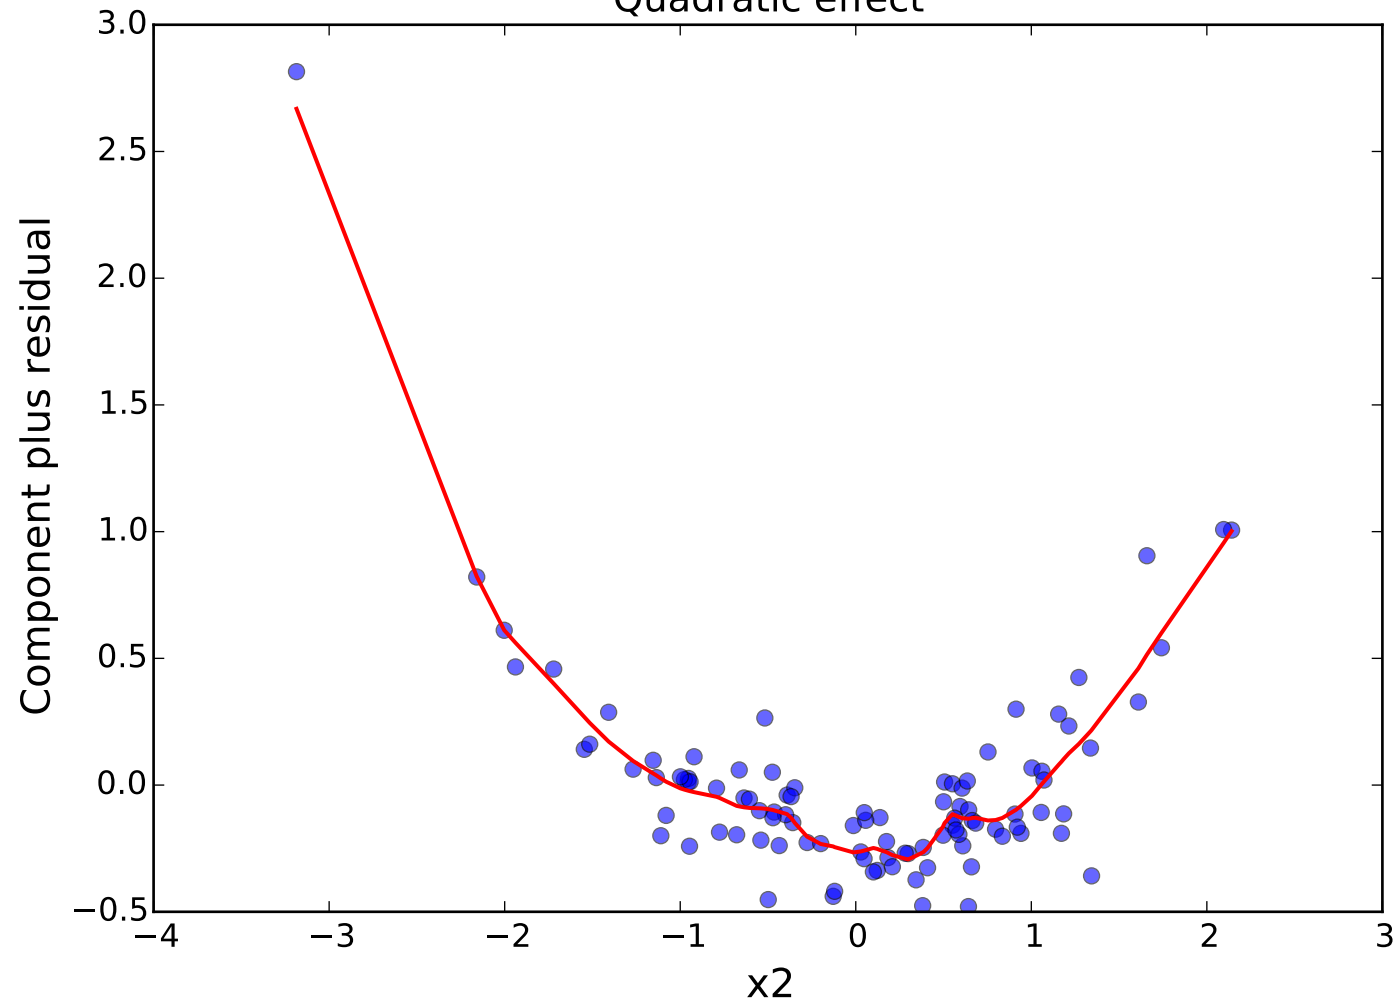

Partial residual plot  
Poisson regression  
Linear effect, slope=1

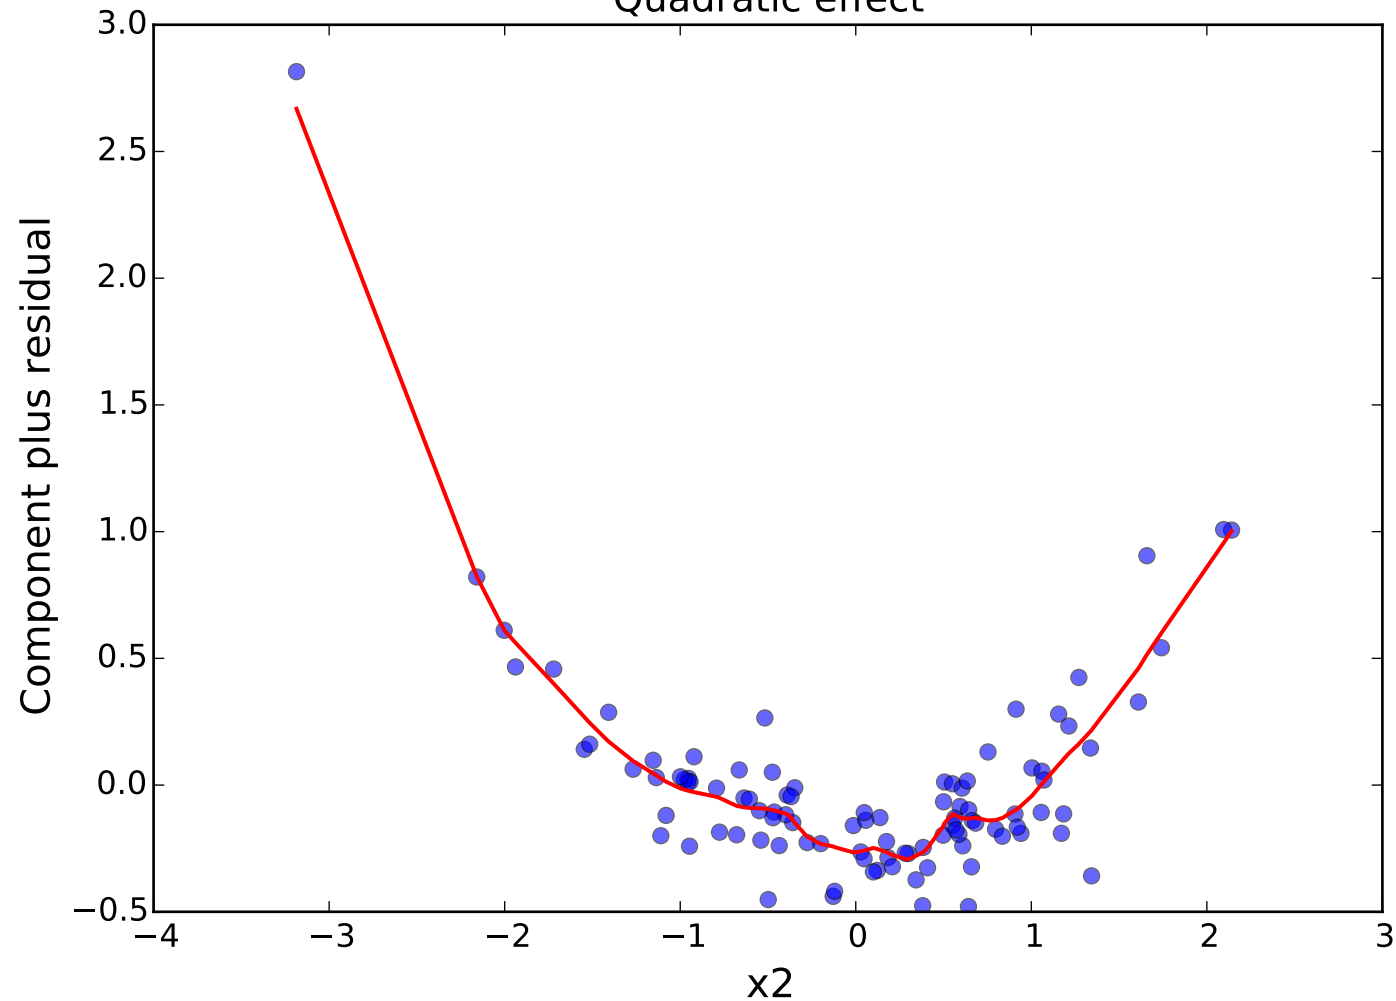

Partial residual plot (called as method)  
Poisson regression  
Linear effect, slope=1

Partial residual plot  
Poisson regression  
Quadratic effect

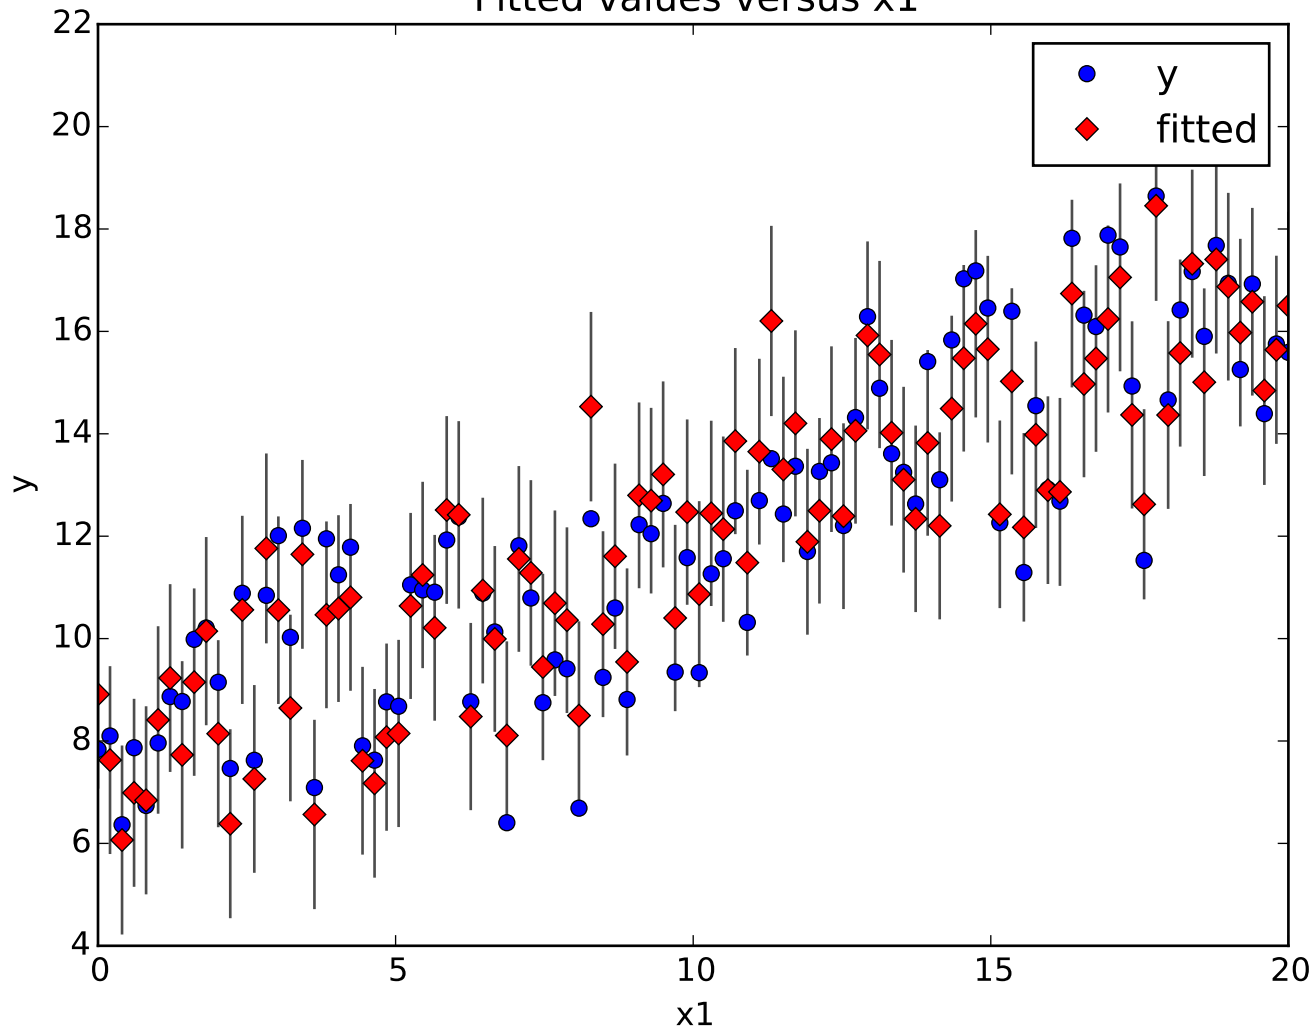

Partial residual plot (called as method)  
Poisson regression  
Quadratic effect

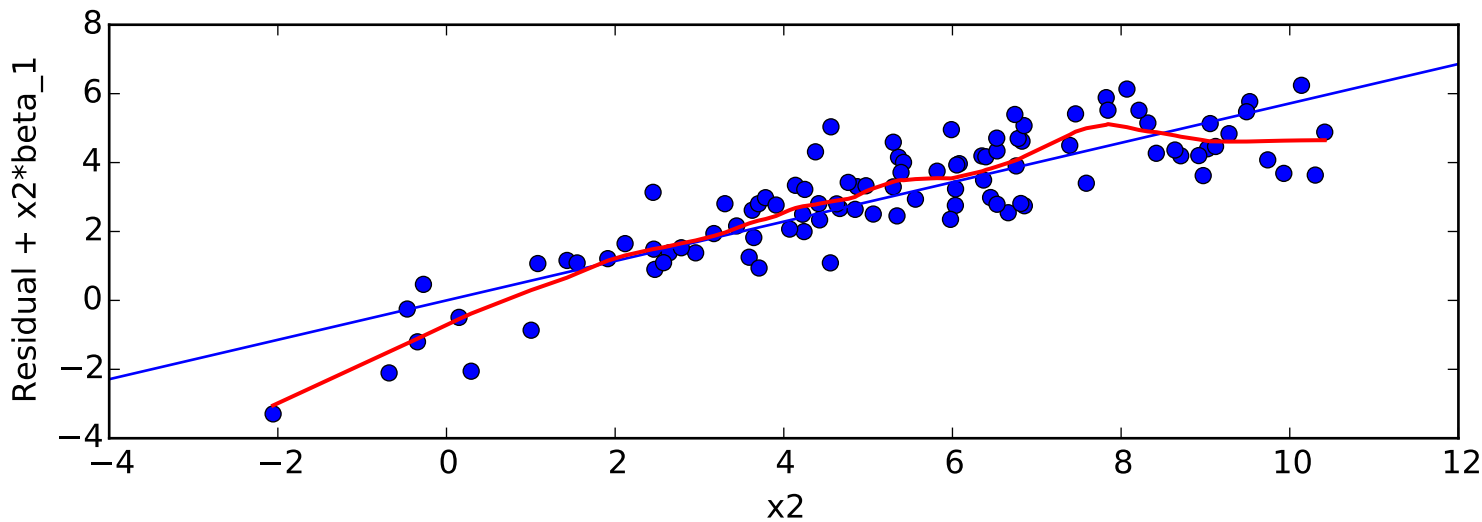

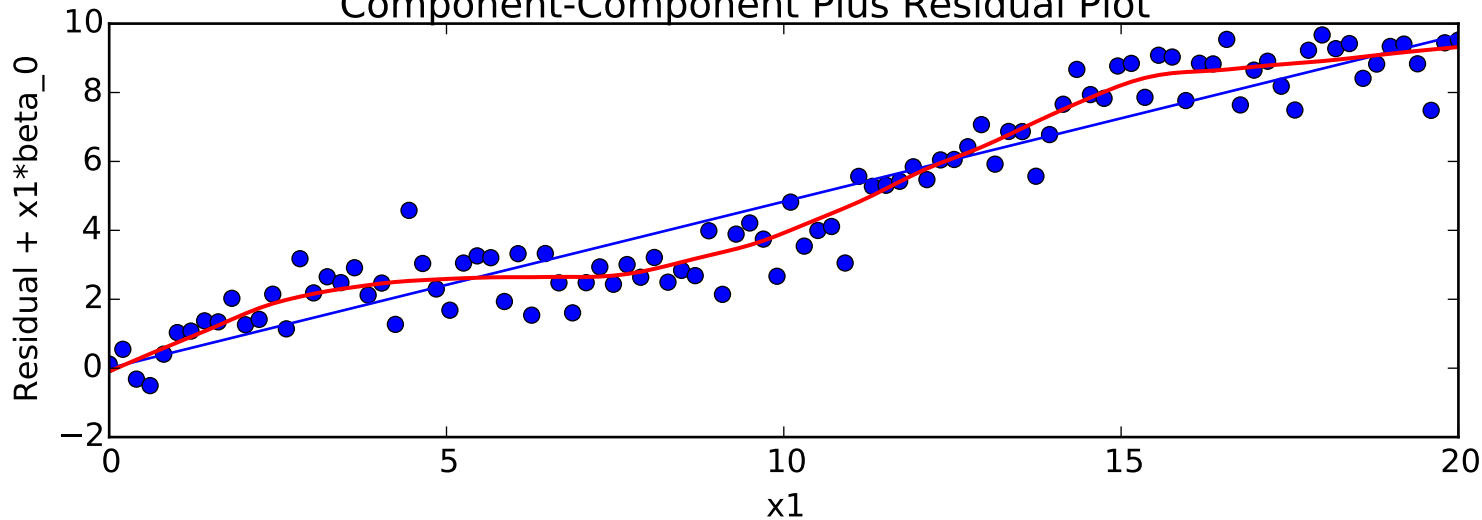

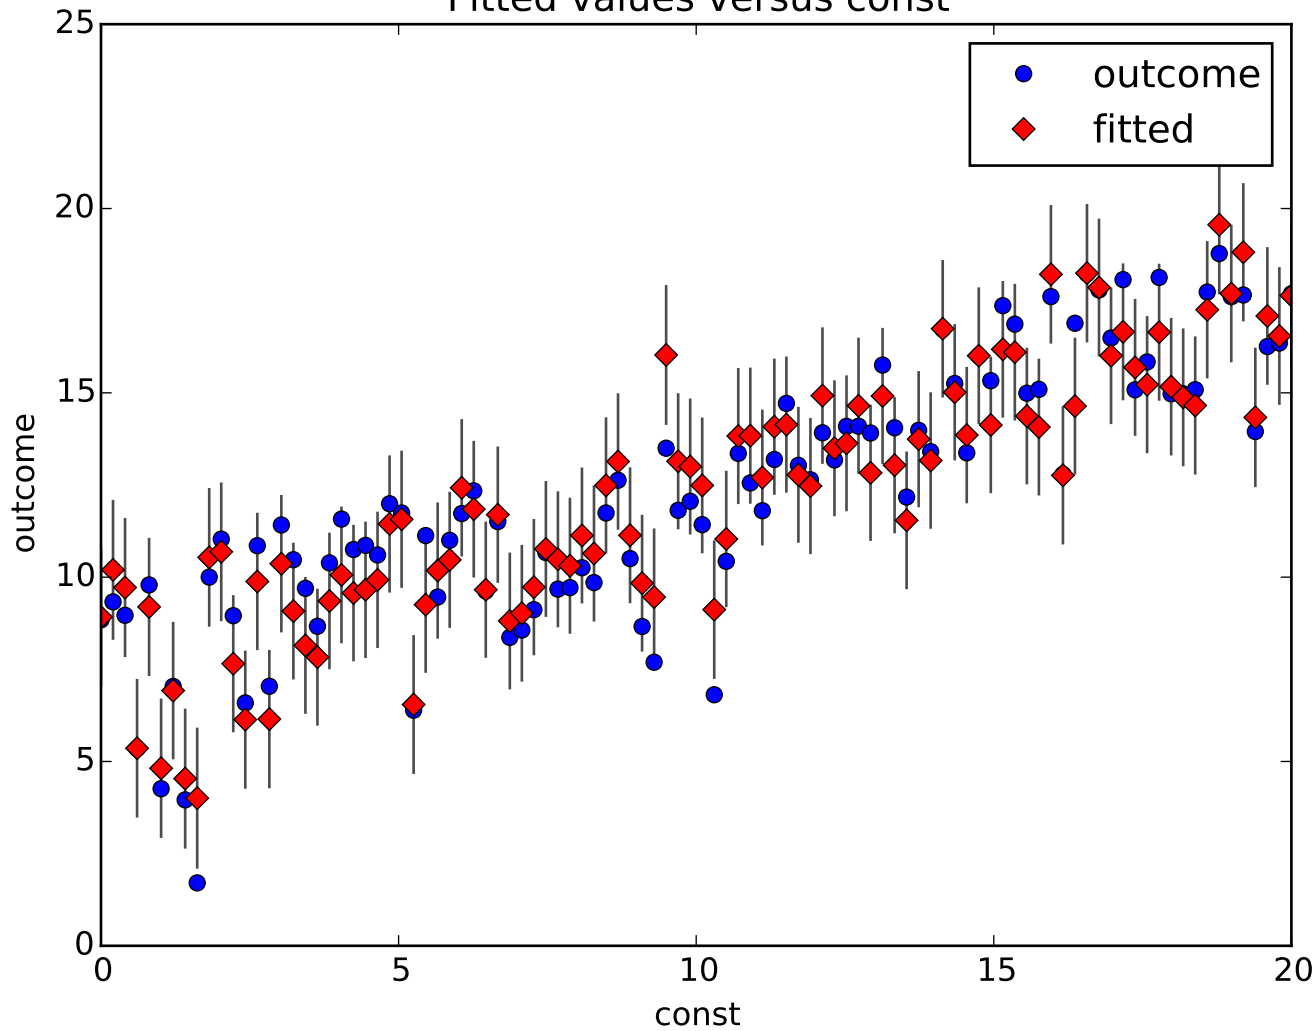

Fitted values versus x1

Component-Component Plus Residual Plot

Fitted values versus const

Component-Component Plus Residual Plot
